YOEMEN READY FOR THE TIGERS

"Our Town"
by
J. B. WHITE

One of our important public enemies, notwithstanding notable progress along the lines of control, is tuberculosis. The fight against this disease, once the scourge of the nation, is progressing in a heartening manner but it has not been won. Many more years of effort may be required before tuberculosis has been eliminated as a source of peril. Meanwhile, funds must be available to carry on the fight.

For 30 years, ever since the idea was first conceived in the mind of a Danish postmaster, Christmas seals have been used as a means of obtaining funds for the struggle against tuberculosis. Today in 40 countries of the world, including our own, this seal is both the harbinger of the Christmas season and the herald of health.

This is a worthy cause. The seals, small and inexpensive, are none the less significent of thoughtfulness and sympathy and serve as an effective weapon against a deadly enemy of the human race.

* * *

About this time people used to prepare to write the history of their lives for the coming year. They invested in a neatly bound diary, all dated for each day in the year, or some friend gave them one. What a nice thing it would be on the succeeding December 31, to look back and see what they were doing each day.

But alas, this enthusiasm often evaporated. The army of diary keepers looked straggling by April 1. Still many people get a kick out of it. There was little doing in their quiet homes, and suppressed heart throbs and spicy comments were inscribed in these white pages, and they felt better to get it out of their systems."

Not many modern folks want to stop to write a history of their lives. They value the dated dairies to keep a record of engagements and special events. Many seem more anxious to forget the past than to remember it. Our eager and restless folks are peering into the future, while their philosophical ancesters were reflecting upon the past.

* * *

What mean those little holiday greeting cards which will soon be flooding the mails? Are they just bits of engraved cardboard, with machine made sentiments picked out of a quotation book? Are they sent out with as little feeling as when you pay a tradesman's bill?

Some cards may be sent, the expression of our too stiff manners. But in the main these pretty missives signify that in these busy and hustling days, there is still a shrine of memory and affection, in which are held dear the old recollections.

Though friends may be separated by thousands of miles, though the cares of life may make the days too busy to renew the old intimacies, yet these cards say that back of the hearts of these people, there is a flame alight, kindled by former ties, which it is proposed to cherish always.

* * *

The human mind is subtly affected by cloudy skies. When the storms of winter come, people are apt to feel less hopeful. Some traveling salesmen remark that they can never sell much goods on a cloudy or stormy day. People seem to lack confidence.

The storms of winter may not seem necessary for our refreshment, but if it were not for them, our water supplies would run dry, and our rivers would not turn their power wheels.

The wise philosopher is not much affected by weather. All kinds of skies look good to him. The artist eye sees beauty even when the sky is obscured by clouds. Sunshine is a wonderful thing, but if we had it every day, we should lose all the sense of its beauty.

* * *

Are you a stationary sort of person, or do you reach out for better things? The business man, the farmer, the worker, who just stands still in his tracks, satisfied with what we had yesterday, and trying merely to

(Turn to page 12)

CHEST DRIVE ON MONDAY

1100 CARS TESTED IN TRAFFIC MILL

Eleven hundred automobiles were run through a traffic gauntlet here Saturday set up by the Texas Highway Patrol to test cars for safety.

Carroll Monroe, statistician, was in charge, assisted by Officer Showers and local city police.

Of cars tested 526 were found correct and 574 deficient. Thus it will be seen that more than half the cars were subject to correction for vital and minor defects. The total of 192 were returned for repairs.

The following report was made in addition: Needing brakes 235; mufflers 43; lights 276; horn 128; steering 53; windshield wipers 195.

The officers are planning a return trip soon. All cars turned back for repairs must be placed in condition. Those who received pink slips indicating condition of their cars are subject to fines if not repaired.

BANDITS ROB MACHINES

A new species of banditry swept Cameron Tuesday when a gang made up of three young men and two girls robbed a number of marble machines and escaped with an undeternined amount of cash.

The machines were robbed by tinkering with the combinations while feeding nickles into them and operating them. They were chased from one business house and in voilating a traffic law were hailed by City Marshal Smith who ran them out on the Rockdale Highway but did not know until he returned to town that they were robbers.

The second machine headed west on the Buckholts road and was lost also. Marble machines due to their daily toll of cash are becoming prized prey for robbers.

WILL DEDICATE NEW BUILDING TUESDAY

An impotant event of the new week is the program for dedicating the physical education and vocational building on Yoe High Campus.

Judge Graham Gillis will deliver the address. The band will give a concert to open the program. On the stage will be J. C. Martin and members of the Board of Education and members of the City Council.

The program will begin at 7:45 p. m. At the conclusion of the program members of the athletic council will escort visitors through the building.

Bon Fire Pep Rally At City Park Tonight

The flame of enthusiasm will blaze high tonight in city park annex when citizens and students join in a huge pep rally and bon fire demonstration on the eve of the momentous game with Belton Tigers at Yoemen field Friday night.

The band will play. Cartons and refuse from stores were being piled high for the fire. It was expected to be the largest pep rally ever held in the city.

Grand Jury Works In City This Week

Convening Monday morning the Grand Jury recessed for Armistice Day and resumed work Thursday. The members are: Louis Guest, Rockdale; A. R. Graham, Milano; Arthur Burnett, Jones Prairie; Claude White, Milano; B. J. Matocha, Cameron; Willis Vogelsang, Ben Arnold; Bartle Crenan, Burlington; B. M. McMillion, Buckholts; Norman Clement, Thorndale; Ernest Backhaus, Lilac; Charles Lafere, Sharp; John Janicek, Clarkson.

GOPHER CO-CAPTAIN

Julius Alfonse is the co-captain and halfback of the powerful University of Minnesota football team.

NEW FORD FOR 1937 ON DISPLAY SATURDAY

The New Ford V-8 for 1937 will be on display at the Hefley-Stedman Motor Company Saturday, November 14, it was announced by Mr. Stedman who has just returned from the factory in Detroit.

Changes have been made in the design of the New Ford and chief among advantages are two motors, one a 60 horse power economy unit and the other the V-8 with 85 horse power unit.

The economy motor sets at rest rumors that Ford would bring out a baby car this year. The lower powered engine is optional with the buyer.

New Fords are ready for delivery and indications are that a big crowd will attend the first showing Saturday.

Fan Co-Operation Asked At Game On Friday Night

Request has been made by the Athletic Council that fans from the Belton special train be unloaded at the north gate. Car drivers are requested to drive to the north gate from the train.

Cameron fans are asked to use both south gates of the field. Crowding at the central gate delays buying tickes. A ticket window will be operated at the east gate also, giving two places of entrance for the Cameron fans.

$6000 Asked For Year 1936-1937

Cameron's Community Chest Drive will begin on Monday November 16, it was announced by the central committee.

Teams will be organized in all sections of the city to contact the people and see that all have an opportunity to share in the necessary funds to provide aid this winter for those in need. All workers will meet at the Cameron Theatre at 9 a. m. Monday for final instructions preparatory to the canvass to follow immediately.

Relief funds of the federal and state governments have been exhausted and care for those in need has been turned back to the community. Thus it will be seen that the responsibility for those who will be cared for through the Community Chest is now placed upon those in more fortunate circumstances whose privilege it is to subscribe the budget.

Of great importance to the people of Cameron is the announcement that there will be no other drives for funds for this organization. In the Community Chest drive to be inaugurated Monday every need has been anticipated not only for strict relief but all other social and charitable programs.

The Chest drive has come about as a result of several months of planning. Meetings have been held and every phase of the community need has been discussed. The community chest is the most desirable and effec-

(Turn to page 7)

F. W. R. HUBERT, SR. PIONEER IS BURIED

Funeral services were held Tuesday morning at 11 o'clock for Frank W. R. Hubert, 89, with the Rev. Dodd of Minerva conducting the services at the cemetery in Minerva. Mr. Hubert died in his home near Minerva early Monday morning.,

Frank W. R. Hubert was born at Mobile, Alabama during a visit of his parents to that state, their home being at Booneville, Texas. He was reared in Texas and received his education in the schools of Brazos county, where he grew up. He assisted his father in his real estate business until he was 20 years old, withdrawing from this in 1867 on account of

(Turn to page 7)

FOOTBALL OFFICIALS

Clyde Littlefield, former head coach at Texas University, will referee the game here Friday night between Cameron and Belton. The other officials are: Hank Clewis, Texas University, umpire; Tom Birdwell, Texas University, head linesman; John Dibrell, St. Edwards University, field judge.

Cameron Life Insurance Company Re-Insures All Acceptable Risks in American Guardian Insurance Company of Madisonville, Texas

The Cameron Life Insurance Company has just completed the re-insurance of all acceptable policy holders in the American Guardian Insurance Company of Madisonville.

A. H. Roberts will continue to have charge of the business of this company in the Madisonville territory and in addition will write insurance for the Cameron Life Insurance Company over its territory.

Leading Company

Cameron Life Insurance Company is one of the leading insurance companies of this type in this section of Texas. It now has approximately four million dollars insurance in force and has an outstanding record for quick and courteous payment of its just claims immediately and in full, maintaining in its several depositories ample surplus in cash to meet all demands in the payment to beneficiaries of full face value of its policies.

The company is progressive and rapidly growing. During the past year agents of this company have written more than $250,000.00 in new business each month.

Paid $23,000.00

Since January 1, 1936, the company has paid over $23,000.00 in death claims and accident benefits to policy holders. The company pays immediately upon proof of death or disability claim all amounts stipulated in its policies.

Insurance is written on both family group and individual policy plan. It writes policies in amounts of $150 up to $2,000.00 and premiums may be paid monthly, quarterly, semi-annually or annually as policy holder may desire. There are no joining fees, dues or death assessments.

A. H .Roberts to Cameron

B. V. Roberts, secretary of the Cameron Life Insurance Company, announced the re-insurance of the desirable risks in the Madisonville company and that A. H. Roberts who has been in Madisonville for the past few months will be with the Cameron Company as well as active in the Madisonville territory.

DRUNK DRIVING

August Guznar of Belmena was arrested by Constable Bailey Saturday night and charged with driving while intoxicated following a crash with a car driven by a Mexican near the Curry school.

May Repeat

COACH CARROL WOOD

When he runs the Yoemen on the field Friday night against Belton he will be playing to win District championship twice in three years. His team won the district in 1934. This year the Yoemen have not been scored on and lead the conference. The game Friday night may decide the issue.

MANY HEAR DEDICATION OF MISSION MARKERS

Father Tom O'Sullivan of St. Michael's church in Burlington, delivered the following address at San Gabriel on Sunday November 1, at the dedication ceremonies accepting markers for the ancient Mission sites near that place:

Friends: On this November 1, 1936, we are assembled for the purpose of unveiling and presenting to the citizens of San Gabriel and of Milam county three beautiful markers or monuments erected by the State of Texas under the supervision of your Milam County Centennial board in recognition of what the early Franciscan pardres have done in the past in their work of teaching the faith of Christ, and also in recognition of these Schools and Missions, the effects, all of which we enjoy today.

Banner of the Cross

Many times during this Centennial year, eloquent tongues have told the

CENTENNIAL TRAIN

Santa Fe announces a special train to Dallas Centennial for school children will leave Cameron at 1:25 a. m. November 17th and arrive in east Dallas within two blocks of the Centennial grounds at 7:15 a. m. The train returns to Cameron on the 19th at 4 a. m. Passengers can return on the night of the 17th if they do not care to remain over for another day. The round trip fare is $1.65 for parties of 25 or over.

GAME WILL DECIDE DISTRICT WINNERS

"Ready" was the word from each camp Thursday on the eve of the important conference game between Cameron and Belton on the Yoemen field Friday night.

With the Yoemen leading in the conference without a loss or a score against them, indication favor them for a win over Belton. If the Yoemen lose, Taylor, Belton and Cameron will be tied for first place, each having lost a game. If the score is tied the conference goes to Cameron. In several ways the game is a deciding factor in the race for 1936 honors.

Coach Wood said his men were in top shape for the game with no injuries, Joe McLean having recovered from the injury in the Rosebud game and Peck in form. Luie Turner will call signals from the quarter position.

Clyde Littlefield of Austin will referee the game. A special train will bring Belton fans to Cameron. The new steel stands on the south side of the field will be ready for the game.

Prediction of fair weather and warmer was responsible for preparations for the largest crowd of the year.

100 Automobiles To Take Belton Fans To Yoemen Field

One hundred automobiles will be on hand for use Friday night to meet the special Santa Fe bringing Belton football fans to the Cameron-Belton game it was announced Tuesday.

Albert Collins, president of the Chamber of Commerce, was to present the matter for co-operation from that body. The Athletic Council and the Lions Club will also co-operate on this mission of courtesy to visitors. The train is due to arrive in Cameron about 7:30.

Rosebud Jerseys To Be Worn By Yoemen In Game Friday

Due to similarity of color in Belton Tiger and Cameron Yoemen uniforms, a change will be made in the Cameron jerseys for the night. Coach Wood borrowed the Rosebud jerseys for the game.

A controversy has arisen over the color tone of the ball to be used. Natural color has been frowned on by Wood and a white ball is frowned on by Coach Safley if the Yoemen wear their 1935 jerseys of white. Every difference was due to be ironed out before Friday night.

Minerva Dog Best In Crockett Meet

Tenessee Girl, owned by Ernest Jacobs of Minerva, scored 65 points Tuesday to lead the pack of 251 hounds in the first days running of the all age event at the Texas Fox and Wolf Hunter's Association 44th annual field trial at Crockett.

In the field of riders was Senator Tom Connally.

Easy Wash Machines And Ironers Greet Readers of Herald

Herald readers will welcome a new advertiser to the columns this week. Easy washing machines by the Schiller Washing Machine Sales is the new advertiser. George V. Schiller owns the company.

Mr. Schiller has made unusual success in this business with headquarters in the B & B Studio building. He stocks these Easy Washing Machines in various sizes and models.

Of especial interest is the electric ironer he sells. They are also stocked in various sizes and models. Mr. Schiller operates demonstration service and will be glad to show you these great new, modern household utilities.

LIKES HERALD

Hubert Horelica, now in the Coyne Electric School in Chicago, writes a change of address for his copy of the Herald and says he enjoys reading about the football games as well as the general run of interesting things in this newspaper.

News From MINERVA

Friends were grieved to learn of the death of F. W. R. Hubert, a prominent Minerva citizen on Sunday evening. We extend sympathy to the bereaved ones.

Mr. and Mrs. Bentley Fletcher were guests of her parents, Mr. and Mrs. Ernest Karisch, at Winchester, on Sunday.

Ernest Jacob is attending the fox hunt at Crockett this week.

Mr. and Mrs. Pope Sealy and son, Pope Clayton of Marlin spent the week end with Mr. and Mrs. Hugh Lucas.

Mr. and Mrs. Isaac Cooper and daughter of Tanglewood visited Mr. and Mrs. Turner Cooper and family on Saturday and Sunday.

Misses Victoria and Mildred McFarland spent Saturday with relatives in Cameron.

Clayton and Margaret Lucas, accompanied by Burford Hardin and Miss Alice Fanning of Cameron attended the Frontier Celeration at Fort Worth on Sunday.

Miss Maysell Gibbs spent the week end in Yarrellton.

Mr. and Mrs. Clarence Harris and son, Donald, visited his mother, Mrs. W. Harris at Frost on Sunday.

Mrs. Clara Gill of Cameron spent Sunday in the R. H. McFarland home.

Mr. and Mrs. Percy Ledwell and children of Ira are visiting his mother, Mrs. Myrtle Ledwell.

Mr. and Mrs. Charlie Trotter and sons, and Miss Sue Sanders visited Mr. and Mrs. Buford Sanders at Waco Sunday.

Mr. and Mrs. Clyde Aldridge and daughter, Dorothy Dell, spent the week end in Houston.

Miss Irene Karisch of Winchester spent Friday and Saturday with Mr. and Mrs. Bentley Fletcher.

Mr. and Mrs. Robert Carey and daughter, Kathlyn, visited her mother, Mrs. Scott at Round Rock on Sunday.

Mrs. G. C. Lucas and grandson, Albert McCullin, Jr., have been ill the past week.

Mr. and Mrs. Dud Currey and daughters visited Mrs. Vernon Edwards at Lexington Sunday.

Mayors of Two Winchesters Meet

An interesting ceremony is pictured here as Mayor C. R. Anderson of Winchester, Va., presents a flag of the American city to Mayor A. T. Edmonds of Winchester, England. The American mayor is in mufti. The flag was presented as a token of good-will from the modern American city to its ancient namesake.

The Ben Arnold 4-H Club met on November 6 with all members but one present. The club girls have received a new member to their club. Miss Virginia Allen resigned as Orchard Demonstrator, but Miss Mildred Folschinsky accepted the place.

Mrs. Homer McElwrath was elected sponsor when Mrs. James Radford resigned.

The next meeting of the 4-H Club will be held Friday November 20.

Ben Arnold School News

Tom Sproull spent Saturday night with Van and A. G. Sweet.

Dencile Coker visited Milton Boone Saturday afternoon.

Bernice Strickler visited her cousin, Ora Lee Strickler on Sunday.

Etoile Mitchell spent Sunday with her aunt, Miss Opal McElwrath.

Willie Mae, Lillian, and Selma Lee Folschinsky went with their parents to Holland to see their new nephew, Carroll John Gohmert.

Reese and Bobby Law Henderson visited the Texas Centennial this week end.

On Sunday night Mrs. Dave McCoy and her son, Charlie Guthrie of Rockdale visited in the home of Annie Beth Cook.

Ruby Sweet spent Friday night with Etoile Mitchell.

On Saturday night Anie Beth, Mary Sue, Mollie Dee and Erene Cook went to Marlow to visit their great grandmother who is ill.

On Wednesday night the New Salem Basketball teams were defeated by the Ben Arnold teams, the girls scores being 31-10 and the boys 20-13.

The Ben Arnold basketball teams played at Travis on Friday night. The boys scores were 38-1 and the girls 46-6 in Ben Arnold's favor.

News From Sharp

By HENRY BROWN

Yellow Jackets Defeat Rogers

The Sharp Yellow Jackets, under the coaching of Wm. Maloch, won a 7 to 6 victory over Rogers Friday in Rogers.

This is Sharp's second victory. They defeated Killeen and Rogers and are hoping to defeat Milano their next game in Rockdale.

Adult Class for Women to Begin In Sharp

Do any of these topics sound interesting to you?

Developing and making the most of my personality.

Dressing to my type for the best results.

Making my room attractive at a minimum cost.

Child care study:

Place of the child in the home.

Health development.

Desirable habit formation.

Guidance and discipline problems.

Eating for adequate nutrition.

Serving of attractive meals.

Etiquette at all times and places.

This is only a suggested list of topics possible for discussion in a class for women and girls not in high school. Come to the Sharp Economics room Thursday afternoon November 12 at 2:30 and suggest others that you are interested in

Bernice Grigsby is sponsor of the class.

Sharp Players Have Social

The Sharp players, an organization of young people, had a social and business meeting Saturday night in Sharp.

This was the first meeting held since they were recently re-organized. Games were played and refreshments of punch and cookies were served.

Sharp People Attend Centennial

There were about 25 Sharp people to attend the Centennial at Dallas over the week end. The Sharp school is to be guests of the Centennial on November 17 and 18.

Personal Mention

Raymond Sheppard of Lilac recently returned from Austin where he visited his sister, Mrs. D. S. Bowler.

Mrs. L. D. Cummings and four children, Ina, Merle, Ida Frances and Viola Joyce, were guests of Mr. and Mrs. W. A. Weaver of Dallas over the week end.

Mr. and Mrs. Edgar Sanders and family of Thorndale visited in this community over the week end.

Official Reports
—*on banking show an impressive feature of business recovery.*
THE report of the Comptroller of the Currency of the United States for instance, shows that there are over 15,800 banks in active operation under the supervision of state or federal banking authorities. Their capital totals more than three and one-half billion dollars and their surplus and reserves amount to over four billion dollars more. Their total deposits have increased in a year to forty-five billion dollars, and their aggregate resources have increased to fifty-six billion dollars.
In reports furnished the American Bankers Association the supervisors of banks in the various states also confirm similar forward trends in their jurisdictions throughout the nation.
These facts and figures show that strong currents of public confidence are aiding the turn toward general business recovery.

YOEMEN DEFEAT ROCKDALE TIGERS IN SLOW GAME

ANOTHER STEP FORWARD IN RACE FOR CONFERENCE FLAG

Led by Joe McLean, sensational Yoemen half back, the promised gridiron classic of the year turned out to be a one sided victory for Cameron Friday night when the Wood men, overcame the Tigers to take one step further toward the conference pennant.

The Yoemen showed an appalling lack of co-ordination but were fought furiously from gong to gong. Rockdale threatened the Yoemen goal three times only to be turned back by a stubbern line that played occasional brilliant football. Cameron's line was cut to shreds in the last half.

Weems, brilliant back from the Tigers, gave an outstanding exhibition. Cameron scored in every quarter and when the game finally ended the count was 26 to 0. Earl Peck shared with McLane in the ground plays that led to much yardage gained. In the air the Yoemen fell flat, although a pass McLean to Stach, Cameron end who has developed rapidly for the varsity, put the ball on the Tiger 1 yard line in the third quarter and resulted in a tally.

The play by play report:

Cameron kicked off to Rockdale with Luther Poole booting a long end-over-end kick down to Rockdale's 24 yard line where it was received by Weems, Rockdale quarter back. Weems was tackled before gaining a yard.

Rockdale's Ball

Gilbert started the battle with a 4 yard gain thru the center of the line. After this Weems had picked up 5 yards through center. Mackie carried the ball for a 4 yard gain and a first down.

Mackie again took the pass from center and gained about a yard thru center, followed by Doss gaining 2 yards at center. On the third down Mackie kicked to McLane who returned to his own 36 yard line.

Cameron s Ball

After an incomplete pass from McLean to Underwood, McLean failed to gain at right end. Then after another incomplete pass from McLean to Stewart, Mclean kicked to Mackie who took the kick on his 2 yard line and returned to his 14 yard line before he was stopped by Poole.

Rockdale's Ball

On the first down, Mackie kicked to the 50 yard line where the ball hit a Rockdale player and Rockdale was penalized 15 yards. In the next play, Weems hit center for a yard gain after which Weems kicked to McLean who returned to his 24 yard line.

Cameron's Ball

McLean led off with a hard drive over right tackle for a 5 yard gain but fumbled the ball and McGuire covered the ball for Rockdale.

Rockdale's Ball

Doss, fullback, took the first pass from center and crashed over right tackle for a first down after which Gilbert picked up a yard at center. After Weems failed to gain at center, he kicked to McLean who received the ball on about the 50 yard line and returned to the 40 yard line.

Cameron's Ball

Luie Turner, smart Yoeman back, took the first pass from center and picked up 2 yards over right guard. McLean then took the ball and broke through right tackle for a first down.

With the ball on Rockdale's 30 yard line, Turner went through the center of the line for a two yard gain after which a forward pass from McLean to Underwood was complete and good for four yards. McLean then took the ball through center, gaining 3 yards and on the last down with only one yard to go, he broke through right tackle for a first down.

On the first down, Peck took the ball for a 3 yard gain around right end. McLean then completed a long forward pass to Stach who was downed on Rockdale's 2 yard line and making a first down for Cameron. McLean then plunged into the Rockdale line with all the force and drive typical of any Yoeman back, when anxious for a touchdown, crossing the goal for a touchdown and the first score of the game. Turner failed to kick goal for the extra point, making the score Cameron 6 and Rockdale 0.

Poole kicked off to Rockdale. It was a long kick that sailed down the gridiron to Rockdale's 2 yard line where it was received by Mackie who returned the ball to his 35 yard line.

Rockdale's Ball

Weems took the first pass from center, circled wide around right end, shaking off a half dozen tacklers and ran 30 yards before he was finally stopped by McLean as th equarter ended.

SECOND QUARTER

Rockdale's Ball

After Doss had gained 3 yards over right guard, Weems picked up five yards through center of the line. In the next play, Weems drove through the line for a first down. Weems drove through the line for a first down. Weems again took the ball but gained only 1 yard after which he failed to complete a pass to Fitzgerald. Doss then picked up a yard over right guard, followed by Weems attempting a pass but it was interceped by Peck on his own 15 yard line and he returned to his 48 yard line.

Cameron's Ball

After Turner gained a yard at center, Peck drove through right tackle for first down. In the next play a complete pass from McLean to Kennon was good for a 5 yard gain and on the second down McLean picked up 3 yards at right tackle and on the third down, he broke through right tackle for a first down.

A forward pass from McLean to Peck was incomplete and on the second down Kennon failed to gain on a reverse play. On the third and fourth downs McLean passed but both were incomplete.

Rockdale's Ball

With the ball deep in Rockdale's own territory, Weems kicked to his own 45 yard line where the ball was killed by Mackie.

Cameron's Ball

McLean drove hard into right tackle, gaining 3 yards. Turner in the next play failed to gain and Cameron was penalized 5 yards. Underwood then picked up 5 yards at left end after which McLean went through right tackle for a first down.

McLean took the first pass from center and heaved a bullet pass to Peck. It was complete and good for 15 yards and a first down. Underwood then gained 2 yards on a reverse play after which McLean picked up 5 yards over left tackle. On the third down, a shovel pass from McLean to Peck was complete and good for a touchdown.. The extra point was no good making the score 13 to 0 in Cameron's favor.

Cameron kicked off to Rockdale with Poole kicking another long kick to Weems who took the ball on his 1 yard line and returned to his 20 yard line.

Rockdale's Ball

Weems, still fighting hard, picked up 2 yards at left end, followed by Clark losing 2 yards on the repetition of the preceeding play. On the third down Weems kicked to McLean who returned to the 50 yard line.

Cameron s Ball

McLean led off with a 3 yard gain over left tackle and then a 2 yard gain at right tackle. Turner then failed to gain at center as the first half of the game ended.

SECOND HALF

Rockdale kicked off to Cameron with Weems kicking the ball to McLean who took it on his 32 yard line and returned to his 40 yard line.

Cameron's Ball

The Yoemen began the second half of the game with a pass from McLean to Stach which was incomplete. McLean went through left tackle for a 5 yard gain and again over right tackle for a 2 yard gain. On the last down McLean kicked across the goal and the ball was brought back in play on Rockdale's 20 yard line.

Rockdale's Ball

Weems, with a strong determination to score on the yet unscored-on Yoemen, drove hard into the center of the line gaining 2 yards. Weems again took the ball and on the second down this time gaining 5 yards at center. Then after Doss had picked up a yard at center, Weems kicked out of bounds on Cameron's 30 yard line.

Cameron s Ball

On a fake and lateral play McLean carried the ball for a first down and in the next play he gained 2 yards over right tackle. On the third down McLean passed to Stewart. It was complete and good for a first down.

Editorial

The time keeper's watch was ticking away the last few minutes of the game. The score board still showed 0-0, and the ball stood on the visiting team's five yard line, fourth down, goal to go!

The spectators were hysterical. The band blared its loudest piece, the pep squad roared its loudest song, and automobile horns shrieked defiance. The visiting bleachers were quiet.

The grimy quarterback was trying to call his signals above the din. Shouts of "Hey, run it across," and "Hey, a pass will work," rang in his ears. He decided to pass.

The team came out of the huddle, crouched into their staunches. The quarterback called "One, two, three." The ball was snapped back, but nobody moved. The opposition swarmed into the ball carrier, and the game ended in a tie.

No team can play its best with too much intereference from the side lines. A good band and a pep squad are a real asset t otheir team if they know when to cheer the boys. The time to encourage the team is before the game and at the half, but please let them play in peace.

Who's Who In the Senior Class

EARL PECK

Earl Peck, football hero, who plays left half-back, has attended school here since he was in the second grade. In his second year of high school he began to play on the regular football team and has continued to fight for Yoemen victory for three years.

Earl's favorite flower, he says, is the white carnation. His favorite color combination is marooon and white. His favorite movie star is Ginger Rogers. Earl states that he prefers brunettes if they are trustworthy—(for insance, who?).

Earl's favorite sports are hunting, swimming and "being a football hero."

He expects to do office work after he finishes high school.

* * *

VIVIAN WHITES

Vivian Whites, a popular Senior of 1937, has spent all but one year in the Cameron schools. She entered school here in the second grade, having had previous instruction in Austin.

Vivian has entered interscholastic tournaments both in grammar school and in high school, going to the district one year.

Since she has been in high school, Vivian has been secretary-treasurer of her class. She took a leading part in the junior play in 1936, and the same year she entered the play contest at county meet.

Vivian's favorite pastime, she says is living down that nick name "Lame Brain," that classmates of hers gave her. Her favorite flower is the orchid—but she never has any.

Vivian belonged to the Latin Club for two years and she went to the tournament in Cleburne and Temple.

Dramatic Club Presents Play

A one-act comedy "Backfire," presented by the Dramatic Club, provided fun last Wednesday in the auditorium.

Nell Williams as Betty Parsons, "turned the tables" on Ella Bess Haygood as "Dorothy," Charles Ed Hensley as "Jimmie," and Charles Sprott as "Frank." The play was bright and humorous and brought forth many laughs from the audience.

Others in the cast were J. T. Owings, Doctor Clark; Vida Graham, Phil; Alberta Conner, Owen.

The play was directed by Miss Lanelle Love, dramatic instructor of Yoe High.

Woodrow Lange acted as stage manager, and Lee Batte Harvey was the electrician.

Band Photograph Taken By Brady

Wednesday afternoon the Cameron Band assembled on the campus to have its first group picture in the new uniforms taken. Francis Cox, director, arranged the band in concert formation, and Mr. Brady of B & B Studio took several photographs of the band. The pictures will be more or less permanent, as there will not be many new players in the band for the next two or three years.

Election System Tested In Poll By Civics Class

Members of C. M. Franklyn's civics class conducted a model election as part of their study of the American electoral system.

The results were: President—Democrats 26; Socialists 1. Other candidates, Democrats 27.

Following the Team Around

After Friday night's duel, the Yoeman goal line still has not been crossed. This is a fine record, but you may rest assured, dear reader that this record will not put many gray hairs in the hides of the Belton Tigers.

The Cameron team is leading district competition with a straight line of victories. Taylor and Belton are in a tie for second with one loss each. If the Yoemen win or tie Belton Friday night, they are the undisputed victors of district 26 B. In case of loss on the part of Cameron, there will be a three-way tie between Taylor, Belton and Cameron. The Yoemen, however, will give their strength to win that game.

METHODIST MISSIONARY SOCIETY

The Womans Missionary Society of the First Methodist Church met in an all day session of prayer Monday with Mrs. R. L. Batte, assisted by Mrs. Susanna Wills in charge of the morning program of Women's work in Japan.

With the afternoon program of home work, "The extension of rural work in Methodism," given by Mrs. John B. Henderson, assisted by Mesdames La Bertice Robinson, W. A. Bonds, Lena Baskin, Bill Baskin, Leland Green, R. L. Batte, W. P. McCall, Bob Terry and others. Mrs. John Rosson presided at the piano during the song service.

Billie Triggs accompanied by Miss Katherine Monroe on the piano, sang "Evening Prayer."

A light lunch was served at the noon hour.

At the conclusion of the day's program an offering for furthering the missionary work was taken to which all responded freely.

Officers for the ensuing year have just been elected for the Missionary Society with Mrs. Leland Green, president; Mrs. W. E. Gaither, vice president; Mrs. La Bertice Robinson, local secretary; Mrs. J. T. Baldwin, corresponding secretary; Mrs. A. M. Horstmann, local treasurer; Mrs. John B. Henderson, conference treasurer; Mrs. Lena Baskin, world outlook superintendent; Mrs. Bill Baskin, publicity agent; Mrs. W. A. Bonds, Supt. local work; Mrs. W. T. Whatley, first assistant.

Superintendent of study, Mrs. J. Coy Williams; Superintendent of Christian social relations, Mrs. W. O. Triggs; Superintendent of Baby division, Miss Leila Batte; Superintendent of supplies, Mrs. Bob Terry

* * *

HISTORY CLUB

Mrs. Roy Law was hostess to members of the History Club Tuesday afternoon at a very delightful meeting with Miss Mary Novich of Waco guest speaker for the afternoon.

Miss Novich brought an illustrated lecture on the history and origin of china, pottery and glassware. Being an authority on these and with a number of articles from her private collection, many of which are from abroad and some of royal origin bearing crests of former owners, the talk was most instructive and interesting.

Members present were Mesdames Stanley Swift, John B. Henderson, Joe Denson, J. C. Martin, Jeff T. Kemp, S. A. Cottle, W. E. Gaither; Misses Winnie Henderson, Katherine Flinn and Ethel Jenkins, with Mesdames H. H. Stedman, Mary Lawrence and W. H. Henley guests of the club. The meeting was presided over by Mrs. Joe Denson in absence of the president, with roll call response on Worth While Books.

The reception suite was adorned with yellow and white chrysanthemums. In the dining room Miss Winnie Henderson poured coffee and Mrs. Stanley Swift served guests from a lace-laid table centered with the chosen flowers.

* * *

42 PARTY

The local council of the Knights of Columbus celebrated on the eve of Armistice Day with a forty two party held in the Knights of Columbus meeting hall.

A large number of council members and their friends were present. Refreshments were served by the women of St. Monica's Parish.

* * *

PRESBYTERIAN AUXILIARY

The Woman's Auxiliary of the Presbyterian church met in circles Monday at 3 o'clack. Circle 1, Mrs. A. W. Rettig, chairman, met with Mrs. John Watson with eight members present; circle 2 met with their chairman, Mrs. Judd Davis. The study program for each circle was foreign missions. Circle 4 met in the home of Mrs. Mary Lawrence at 9:30 in the morning with Mrs. Lawrence and Mrs. Knipp acting as co-hostesses. The program, with Mrs. O. C. Acrey as chairman and Mrs. Carl Black as leader, was on work in China. An array of articles from China displayed about the living room further carried out the program idea. A social hour followed with the hostess serving a lovely refreshment plate with coffee and tea.

* * *

D. A. R.

Mrs. B. J. Baskin and Mrs. Sam Mewhinney were join thostesses to a meeting of the D. A. R. Thursday afternoon at 2 o'clock at the home of the former.

Mrs. R. H. McIntosh presided over the formal opening and routine of business. Response to roll call, American colleges and universities.

Miss Irma Porter was in charge of the afternoon program and the subject was Approved D. A. R. schools.

Out of town guests were Mesdames W. B. Thomas of Rogers, T. V. Adams and Sam Mewhinney of Buckholts.

A social hour followed with the hostesses serving a salad course with drink and pineapple parafait.

* * *

PARENT TEACHER MEETING

Thursday, November 19 at 3:30 p. m. the P. T. A. will meet in the Yoe High Auditorium.

An interesting program, under the direction of Mrs. Vernon McIntyre, the new president, will be rendered. The meeting will last one hour. Come prepared to stay no longer. Refreshments will be served.

* * *

SPEAKERS INSTITUTE

Mrs. Stanley Swift was hostess at a call meeting of members of the Speakers Institute Tuesday afternoon for the purpose of hearing Miss Mary Novich, a house guest of the day of the hostess. Talks on china, pottery and glass ware, which the guest speaker is so well informed on were made.

NARCOTIC DRIVE IS STARTED BY T-MEN

Custom Agency Men Will Be Reorganized.

Washington. — The Treasury department, flush with its success against rum smugglers, has now opened a drive against narcotic smugglers. To this end, Secretary of the Treasury Henry Morgenthau announced that customs border patrols would be reorganized into one centrally headed unit.

The custom agency service, numbering 570 men, will be divided into four districts encompassing the nation's land and water boundaries. District chiefs will be placed under the immediate supervision of Harvery A. Benner, deputy commissioner of customs. Benner's offices are in Washington. In the past the border patrols have been under the jurisdiction of the various customs collectors in a large number of districts.

"We are going to hit narcotics smuggling as hard as we hit liquor smuggling," said Mr. Morgenthau, "particularly on the Pacific coast where it is most prevalent."

The new patrol will be divided into the following districts:

Northeast patrol, headquarters, Buffalo, N. Y., to include the present customs collection districts of Michigan, Ohio, Buffalo, Rochester, St. Lawrence, Vermont, Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, Philadelphia, Maryland and Virginia.

Southeast patrol, headquarters, Jacksonville, Fla., to take in the present districts of North Carolina, South Carolina, Georgia, Florida, Mobile and New Orleans.

Southwest patrol, headquarters, El Paso, Texas, to take in the districts of Sabine, Galveston, San Antonio, El Paso, Arizona, San Diego, Los Angeles, and San Francisco.

Northwest patrol headquarters, Havre, Mont., to include the districts of Oregon, Washington, Montana, Idaho, North Dakota, Duluth, Superior and Wisconsin.

THOMAS G. KIRK DIES AT LIBERTY

Funeral services were held for Thomas G. Kirk, 78, in Liberty Saturday afternoon November 6 at 4 p. m. with the Rev. O. C. Acrey conducting the services. Interment was made in the Liberty Cemetery.

Mr. Kirk died Friday evening at about 3 o'clock in the home of his youngest daughter, Mrs. Roy Nunn of Milano, after having been ill for several months. Surviving are one brother, Yates Kirk, three sisters, Elsie Mills, Rocksie Duse and Bell Turney; five daughters, Mrs. Walter Malone, Mrs. J. O. Elliott, Mrs. Roy Nunn, Mrs. Tom Mitcham, and Miss Abbie Kirk and four sons, J. D., Marvin, Edward and Kenneth. Also surviving are fifty-two grandchildren and five great grand children.

"Grandpa" Kirk, as he was called, was a loved citizen of the Liberty community and had lived there all his life.

Keep a Good Laxative "always in your home"

Among the necessities of home is a good, reliable laxative. Don't be without one! Do your best to prevent constipation. Don't neglect it when you feel any of its disagreeable symptoms coming on. . . "We have used Thedford's Black-Draught for 21 years and have found it a very useful medicine that every family ought to have in their home," writes Mrs. Perry Hicks, of Belton, Texas. "I take Black-Draught for biliousness, constipation and other ills where a good laxative or purgative is needed. I have always found Black-Draught gives good results."

Sold in 25-cent packages.

Official Reports

—on banking show an impressive feature of business recovery.

THE report of the Comptroller of the Currency of the United States for instance, shows that there are over 15,800 banks in active operation under the supervision of state or federal banking authorities. Their capital totals more than three and one-half billion dollars and their surplus and reserves amount to over four billion dollars more. Their total deposits have increased in a year to forty-five billion dollars, and their aggregate resources have increased to fifty-six billion dollars.

In reports furnished the American Bankers Association the supervisors of banks in the various states also confirm similar forward trends in their jurisdictions throughout the nation.

These facts and figures show that strong currents of public confidence are aiding the turn toward general business recovery.

Hubert

(Continued from page 1)

ill health and going on a farm which he purchased in the Brazos bottoms, where he remained engaged in farming until 1874. At that date he located at Rockdale, where he embarked in the mercantile business, which he followed there for two years. He then married, and having purchased the farm on which he lived at the time of his death, he moved to it, where his time was passed pleasantly and profitably in agricultural pursuits, for which he always had a great taste.

Married In 1876

He was married in 1876 to Miss Mary M. Sanders, of Milam county. To them a family of six children were born: Florence, Sherrod, Grace, Annie Ross and Ralph, all living now except Ross, who was killed by a train in 1914, and Florence who died in El Paso in March of this year.

Mr. Hubert was a great reader, and was a regular subscriber to a number of papers and magazines. He was one of the most hospitable of men, and those who met him and felt the pressure of his hand and met the steady glance of his clear, blue eyes, will not soon forget him.

Among the best known survivors here is Dr. W. R. Hubert, for many years a practicing physician in Cameron and Milam County with offices in the Geo. A. Thomas Drug Store. To Dr. Hubert go the sympathies and condolences of the entire city in the loss of his father, one of the great pioneers of Texas.

Pallbearers were: David Robinson, Jr., Huling Hubert, Raymond Hubert, Jim Sam Perry, Preston Perry, Jr., Dan Tyson.

* * *

F. W. R. HUBERT

F. W. R. Hubert, one of Milam county's most prominent citizens and early settlers, died at his home at Minerva on Sunday evening, November 8.

Mr. Hubert was born in Mobile, Alabama, on September 17, 1847, and spent his boyhood days in Milligan, where Bryan, Texas now is. He attended school at Bryan and later studied medicine for a period of two years. He moved to Rockdale 60 years ago where he married Miss Mae Sanders on December 6, 1876. To this union were born eight children, five of whom survive as follows: J. S. Hubert, Cameron; Frank and Ralph Hubert, Minerva; Mrs. C. W. McBurnett, Dallas and Mrs. D. F. Robinson, Minerva. His widow also survives him.

He was a lover of ourdoor sports, and often went deer and fox hunting when a young man. He was also an extensive reader and wrote stories for the "Red Ranger." His orchards and vineyards were among the largest in Milam county.

Funeral services were conducted at the Minerva Cemetery on Tuesday morning at ten o'clock. The Rev. A. L. Dodd, pastor of the church of Christ, was in charge of the services, assisted by the Rev. Walton Day, pastor of the Methodist church. Phillips and Luckey were in charge of funeral arrangemenlts.

Relatives present for the funeral were: Mrs. Lurline Harris, Dallas; Frank Hubert, Austin; a sister, Mrs. Bonner, Rockdale; Misses Mae and Julia Marshall, Cameron; Mesdames Preston and C. M. Perry, Rockdale; Mrs. Bill Clithroe and son, Billie Ray, Houston; Raymond, Hester Mae, Huling and Ralph Hubert, all of Houston; Mrs. N. F. Currey, Baytown; Misses Esther and Mary Frances Robinson, Huntsville; Miss Annie Marie Robinson, Friendship; Miss Mae Agnes Hubert, Cameron; Jim Sam Perry, Rockdale and others. A host of friends also attended. Two daughters, Mesdames C. W. McBurnett and D. F. Robinson were unable to attend because of illness.

Pallbearers were grandsons of the deceased.

New 1937 Ford V-8 Coupe

THE smart new front, new bar-type bumpers, slanting V-type windshield and smoothly flowing lines of this five-window coupe, pictured above, typify the advanced design of the new Ford V-8 cars for 1937. The coupe, which is offered both with and without de luxe equipment, is the only single-seat closed body type. Its seat is full width, with folding divided seat back. The spare tire is carried in a compartment back of the driver. The deep luggage compartment can be reached either through the rear deck door or by tilting down the right seat back. New "finger-tip" steering and new easy action safety brakes are featured. Two engine sizes are available

Chest Drive

(Continued from page 1)

tive method to handle relief and other fund requirements. Thus it will be seen that the Chest more nearly meets the needs than any other plan and not only provides adequate funds for those in need but finances all character building organizations in the community.

Careful planning with the application of economical methods a budget of $6000.00 has been fixed as the amount necessary to take care of the needs of the community until November 1, 1937. Only Cameron and its immediate vicinity is to be served through the community chest. The committee wishes to re-emphasize that no other canvass will be made for funds for the organization.

For the information of the people, the Community Chest is composed of the following organizations: Cameron Welfare Board, formerly known as United Charities. Officers of the organization are: Mrs. Cora Cammer, chairman; Mrs. W. G. Gillis, vice-chairman; Johnny Andres, secretary; Alvin Dusek, treasurer. Every applicant for relief will be investigated by a case worker before relief is granted.

Other organizations are: Boy Scouts, Rev. J. P. Love, chairman. The Scout movement takes rank amoung the important character building organizations of the community and progress worthy of the best traditions of Cameron has been made and the Committee feels that to accomplish these aims for the Boy Scouts through the Community Chest will be noteworthy advancement.

Girl Scouts, Mrs. Lottie Bigbee, Chairman.

Child Welfare Board, Mrs. J. P. Love, chairman, interested especially in crippled children in co-operation with the state board.

Colored Day Nursery, Dr. D. E. Connor, chairman, provides a place for small children of mothers that they may be able to work in various homes of the city.

In order to facilitate the work of the committee the people are urged to determine in advance what their subscriptions will be, to make liberal pledges and to be ready when the committees call on Monday. Full cooperation is asked of the people.

Officers of the Community Chest:
Stanton Dossett
Mrs. W. E. Gaither
Homer McLane
Mrs. W. O. Triggs
Albert Collins
J. T. Baldwin

MAYORESS FROM CHILE

Paying a long-deferred visit to New York is Mrs. Alicia C. De Errazuris, who is shown on the S. S. Santa Barbara. Back home in Chile the senora is mayor of Providencia, one of the country's most aristocratic residential communities. She is believed to be the first woman to hold such a post in a South American republic.

JAMES ROGERS, 68, DIES HERE MONDAY

James Rogers, 68, father of Mrs. H. N. Tate of Cameron, was found dead in his bed at the Tate home in this city at 6 a. m. Monday by Mr. Tate who went to his room to awaken him for the day.

Mr. Rogers had been dead for some time. He had not been in the best of health. He had made his home in Cameron for the past 15 years, coming from Illinois.

He lived most of his life in St. James, Missouri. He was married to Miss Helen Mattlock who died in December, 1924, and is buried in Missouri.

Deceased is survived by six children: Mrs. N. H. Tate, Cameron; George Rogers and Mrs. Venita Veach and Earl Rogers of Springfield, Illinois; Mrs. Ruby Brim, St. James, Missouri, and Bert Rogers of Greenville.

WACO AWARDS GO TO LOCAL FFA MEMBERS

Seven first prizes, nine seconds, twelve thirds, and one seventh prize brought more than fifty dollars cash to the C. H. Yoe chapter of Future Farmers as a result of their exhibit of agricultural products at the Brazos Valley Free Fair, Waco, which closed Sunday night.

These winnings included a third place in community exhibit, in which 14 towns competed for honors. The Cameron booth scored 865 out of a possible 1000. Twenty crops, gathered from the farms of the FFA members and prepared for exhibit in the Vocational Agriculture classrooms, were shown in the community display. The FFA educational booth placed seventh in a field of fourteen, for a cash prize of $10. The community booth brought $23 to the FFA chapter. Last year the boys had 2nd place community exhibit at Waco but dropped to tenth on the educational display.

The individual winnings were numerous and included placings on cotton, corn, grain, sorghums, vegetables, and other products. A majority of the crops shown were brought in by the following boys: Von Hickman, Walter Anderle, Charlie Joe Maddox, Oscar Robbins, Hilry Nabours, Fritz Kornegay, Dee Hitt, Talmadge McGregor, Howard Pressley, C. E. Woodum, James Leath, Dana Monroe, Pete Laywell, Chesley Birkelbach and others. H. E. Graham, Chas. Terry and others donated products for use in the fair.

DENTON, November 10.—Misses Dorothea Kubecka and Frances McDermott of Cameron were recently initiated into their club at Texas State College for Women. A high scholastic average in all business courses is required of members of the club, which is affiliated with the Denton chapter of the State organization. Miss McDermott is the daughter of Mr. and Mrs. D. J. KuDermott, and Miss Kubecka is the daughter of Mr. and Mrs. D. J. Kubecka.

Try CARDUI For Functional Monthly Pains

Women from the 'teen age to the change of life have found Cardui genuinely helpful for the relief of functional monthly pains due to lack of just the right strength from the food they eat. Mrs. Crit Haynes, of Essex, Mo., writes: "I used Cardui when a girl for cramps and found it very beneficial. I have recently taken Cardui during the change of life. I was very nervous, had head and back pains and was in a generally run-down condition. Cardui has helped me greatly."

Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician.

FUTURE FARMERS WIN AT TEMPLE EXHIBIT

Six first prizes and one second on individual entries; a third on community booth and a tenth place on Vocational Agriculture display earned $19 for the C. H. Yoe FFA chapter at the Central Texas Exposition, Temple, Chas. Roy Law, chapter secretary, reports.

Products for the displays came from the homes of the FFA members and were prepared for exhibit in the class room. The boys winning in the individual entries were Eddie Allison, John Pressley, Talmadge McGregor, Winford Boecker, Herman Gerick, Dee Hitt, Von Hickman and Roland Boedeker.

The above group and a number of other boys furnished products from their farms for the community and Vocational Agriculture exhibit. The two main exhibits had 45 different products in them. In addition, the FFA exhibit carried an educational feature that tanght a lesson in the control of Cotton Root-Rot.

Canned goods in the exhibits were furnished through the courtesy of Miss Bertha Fae Strange, home demonstration agent. H. E. Graham furnished honey for the community booth.

Orphans Home

A truck loaded with provisions for the Buckner's Orphans Home will leave Cameron Thursday to carry Cameron's contributions to the Baptist orphans.

Donations will be received on November 16, 17 and 18. Everyone is urged to contribute food, clothing, toys, produce and feed. F. J. Beckerman's store will serve as headquarters.

Dr. and Mrs. James Watson left Tuesday for Cuero for a visit.

Write your favorite recipe on a postal card or sheet of paper and send to:
MRS. BLANCHE STONE, 405 CAPPER BLDG, TOPEKA, KANSAS

Lady's Painful Trouble Helped By Cardui

Why do so many women take Cardui for the relief of functional pains at monthly times? The answer is that they want results such as Mrs. Herbert W. Hunt, of Hallsville, Texas, describes. She writes: "My health wasn't good. I suffered from cramping. My pain would be so intense it would nauseate me. I would just drag around, so sluggish and 'do-less.' My mother decided to give me Cardui. I began to mend. That tired, sluggish feeling was gone and the pains disappeared. I can't praise Cardui too highly because I know it helped me." . . . If Cardui does not help YOU, consult a physician.

Airlanes Furnish Theme For Daring Film at Milam

For a long time aviation experts have been striving to establish passenger service which would enable travelers to go around the world by air on regular passenger sky ship routes. The goal has been achieved, although it is not generally known. It is now possible to complete the trip around the globe on established airlines within 30 days, with a surprising degree of comfort. The aerial circumnavigator travels by transport plan, Clipper Ship and Zepplin to make the tour.

Route Defined

The route followed is from London to Singapore; thence to Sourabaya on the Maylay Peninsula; to Manila and on to San Francisco and New York. From New York to London, the sky sojourn is made in a Zeppelin. Some people may find one slight obstacle in making the trip. It costs $3,000.

A plan for completing a world encircling passenger service entirely by plane, is the central theme of Eddie Rickenbacker's "Ace Drummond," the Universal air adventure film based on the newspaper feature strip of the same name. The opening episode of the chapter play was shown at the Milam Theatre Friday and Saturday November 13 and 14.

Story In Magnolia

The story has its setting in Magnolia, where the air transport line is attempting to complee the last link in the globe-encompassing plan. Vicious opposition almost defeats the company, until Ace Drummond battles the powerful "Dragon" which blocks the airline's advance.

One of the striking features of the production, say Hollywood reports, is the use of spectacular flying stunts during struggles between opposing airplane forces. The looping, zooming, diving plane driven by Ace Drummond does inside and outside loops, falling leaves, barrel loops, Immelman turns, side slips, power dives and pulls out of tailspins with pulse-stopping manoevres, according to Coast to Coact scouts.

John King Star

John King portrays Ace Drummond and Jean Rogers is his leadidng lady. Noah Berry, Jr., has a featured role. An important member of the cast is Guy Bates Post, who was an outstanding stage star for more than a quarer of a century. Robert Warwick, stage and screen favorite of ten years ago, is another featured player.

Football

(Continued from page 4)

Then MceLan again took the ball, this time gaining only 2 yards at center.

On the second down, Underwood circled left end for a 4 yard gain followed by McLane crashing through right tackle for another first down.

After picking up another 2 yards at right tackle, McLean completed a forward pass to Uuderwood which was good for about 8 yards and a first down.

In the next play, McLean carried the ball through the center of the line down on Rockdale's 1 yard line and the next play crossed the goal for another touchdown. Turner kicked the goal for the extra point, making the score 20 o 0 in Cameron's favor.

Poole kicked off to Rockdale with McGuire taking the ball on his 25 yard line and returning to his 30 yard line.

Rockdale's Ball

Weems led off with a 2 yard gain through the center of the line and followed with another gain of 3 yards through center. Jack Weems, Rockdale tackle, but now in backfield, also tried center, making only a yard. Weems then kicked the ball to Cameron's 10 yard line where it was killed by Gilbert.

Cameron's Ball

With the ball deep in Cameron's own territory, McLean kicked. Mackie received the ball and returned to Cameron's 30 yard line.

Rockdale's Ball

After Weems had lost 4 yards, Doss gained it back through the center of the line. On the third down, Doss again took the ball and went through center for a first down, Weems then took the ball and fumbled but recovered for a yard loss. Rockdale was penalized 5 yards and the play was called back with Gilbert failing to gain at center as the third quarter ended.

FOURTH QUARTER

Rockdale resorted to an aerial attack as their only means of scoring on the Yoemen but all three passes were incomplete.

Cameron's Ball

After a three yard gain by Turner, McLean circled right end for a five yard gain and then drove through the center of the line for a first down. McLean then took the ball and gained two yards at center after which he passed but it was incomplete.

On the third down, McLean hit the center of the line hard, making another first down. Underwood then took the pass from center and picked up 2 yards on a reverse play and on the second down McLean failed to complete a pass to Underwood. Then after Mclean had fumbled and Peck recovered, he booted a long spiral down to Rockdale's 3 yard line where it was killed by Poole.

Rockdale's Ball

Weems, standing behind his own goal line, kicked to McLean who returned the ball back to Rockdale's 10 yard line.

Cameron's Ball

With the ball on Rockdale's 10 yard line, McLean plunged into the line, gaining 9 yards before he was stopped on the 1 yard line. Then after Turner failed to gain at center, McLean carried the ball over for the final touchdown of the game. Turner failed to kick goal for the extra point and the score was 26 to 0.

Poole kicked off to McGuire who received the ball on his 25 yard line and returned to his 30 yard line.

Rockdale's Ball

Weems, still fighting hard, plunged into the maroon and grey line, gaining 3 yards. Doss then picked up 5 yards on a spin play and two yards at center. On the last down a short pass was good for a first down

After a two yard gain at center by Clark, Weems took the ball and ran for a first down and followed with another four yard gain through the cente rof the line. On the third and fourth downs Clark failed to gain and on the last down a short pass from Weems to Doss was incomplete.

Cameron's Ball

In the last minute of the game, McLean took the ball and broke loose for an 80 yard run and a touchdown but the officials called the play back. Turner then carried the ball for a two yard gain over center.

After McLean had failed to gain through the center of the line, Turner drove into the line for a two yard gain as the game ended with the score being 26 to 0.

SIX SONGS! DANCES, TOO!

Cameron, Sunday March 22

DON'T GAMBLE
. . WITH A COLD

COMMON colds are dangerous! Don't gamble with them. You will lose more often than you will win. Even if you are lucky and recover from a cold within a few days without loss of time or money, YOU STILL LOSE. Any illness to a member of the family is definitely false economy because colds create a condition of depressed physical vitality.

This is the age of preventive medicine and medical science has followed the formula that "it is better to keep well than to get well." Therefore, don't gamble. Strike at the root of common colds by eliminating conditions that contribute to "catching cold."

If the temperature of any room in the house is insufficient for comfort it is INADEQUATE FOR HEALTH. Members of the family go from a heated room into a cold hall or adjoining unheated room; then shivering and chilled, they return to the heated room. This is one almost certain way to catch cold.

Protect your family against sudden changes of temperature. Give them the benefit of healthful, pure, warm air throughout the home. If you have been heating only one or two rooms, don't go through another winter without complete health protection. If you prefer individual unvented room heaters of the open flame type, be sure to use ONE IN EACH ROOM and provide adequate ventilation from slightly opened windows. Keep connecting doors open from one room to another so that a natural circulation of healthful, warm air prevails throughout the home.

Heat your entire house and provide adequate ventilation of pure air . . . for your health's sake!

The common cold germ is a constant threat to your well-being during the winter season. If you do catch cold—don't gamble; consult your family doctor before it has an opportunity to undermine your health.

At The THEATER In Cameron

By C. W. GJEDDE

"GREEN PASTURES"

The sniging of the spirituals in the Warner Bros. picture, "Green Pastures," which comes to the Cameron Theatre Monday and Tuesday November 17 and 18, is "a capella," that is, without instrumental music. Hall Johnson, who heads the famous choir of sixty voices, explained the reason for this.

When the early devotees devised the spirituals, said Johnson, "music instruments were not permitted in their churches, but so ingeniusly did they blend their voices that the absence of instruments was not a handicap. I use the male voices for volume, the female voices for coloration."

The famous choir sings 25 spirituals for the picture besides furnishing background music.

Marc Connelly, the author, co-directed the picture with William Keighley and wrote the screen play in collaboration with Sheridan Gibney.

* * *

"THE GREAT ZIEGFELD"

From the checkerd and colorful career of a great and famous showman, William Anthony McGuire has spent a hearty, amusing, highly sentimentalized and vastly engaging screen play in "The Great Ziegfeld," which comes to the Cameron Theatre Sunday and Monday, November 15 and 16.

Acted with spirit and understanding by an expertly directed cast, the film projects itself across the screen without losing a whit of its theatrical effectiveness. As the producers knew when they chose the career of the late Florenz Ziegfeld Jr., for screen exploitation the theatrical ups and downs of the Glorifier of the American Girl offered the very stuff of which zestful and glammorous films are born—music, romance, excitement, adventure, and color..

William Powell and Myrna Loy are co-starred in the leadinlg roles.

* * *

"THE DEVIL IS A SISSY"

Young Freddie Bartholomew apparently excels in any role that comes his way. The boy who gave us such a vivid portrayal of "David Copperfield," and again as "Little Lord Fauntleroy," now appears as a modern urchin of New York's lower East side in "The Devil is a Sissy," which comes to the Cameron Theatre Friday and Saturday November 13 and 14.

In the Metro-Goldwyn-Mayer picture of contemporary boyhood in the great cities, Freddie co-stars with Jackie Cooper and Mickey Rooney, Ian Hunter and Peggy Conklin provide the romantic interest in a touching love story that enters into the adventurous narrative of the boys.

Others in the cast are Gene and Kathleen Lockhart, Sherwood Bailey and Buster Slavin. The story was written by Roland Brown.

* * *

"BACK TO NATURE"

The campfire burns—and so does Dad!—as the happy, scrappy Jones family goes on a hilarious vacation in "Back to Nature," new Twentieth Century Fox hit coming to the Cameron Theatre Thursday November 12.

With the Jonses filling the wide open spaces with fun and romance, the film is a merry triumph of mirth and adventure as the entire family goes vacationing in an automobile trailer.

Jed Prouty, Shirley Deane, Dixie Dunbar, Tony Martin, Spring Byington, Kenneth Howell, George Ernest, June Carlson, Florence Roberts and Billy Mahan are featured in the film.

FARM CLUB NEWS

"Why not save part of that food money by producing your fruit at home?" shall be the question every club girl will be asking you soon.

With a little land, a few odd hours during the year spent working with their trees and with the cost of only a few dollars, they intend to prove that Milam county can produce fruit on a small scale, at least as well as cotton.

One half to one acre planted in a variety of fruits chosen to ripen in succession will supply a family of 6 with fresh fruit in season and a surplus to dry, can and preserve and pickle for the winter pantry. To the rejoinder that fruit doesn't pay, it may be replied that most farm families have to grow their own or go without. On this basis fruit growing is as renumerative as life itself, for without fruit in the diet there can be no health.

Be like the 4-H girls and start you an orchard this year. You will really enjoy an orchard, grape vineyard and berry patch. Don't let the superstition that fruit does not thrive here stop you!

* * *

That the Milam County Home Demonstration Club Women and girls believe in putting up as fine quality canned products as they do large quantities of products was shown by the 19 awards they received at the Brazos Valley Free Fair at Waco. They took 11 first prizes; 4 second and 4 third prizes.

The prize winning products were as follows:

Home Demonstration Women—First Place: Snap Beans, Mrs. Annie Yount, Gardner Club; Pickled Beets, Mrs. D. K. Hall, Ad Hall Club; Stuffed Pickle Rings, Mrs. Adolph Hanel, Ad Hall Club; Dewberries, Mrs. J. H. Glass, Ad Hall Club. Second Place: Canned ePaches, Mrs. Ethel Brewer, Curry Club. Third Place: Cabbage Kraut, Miss Agnes Horelica, Ad Hall Club.

Girls' 4-H Club—First Place: Salad Pack Tomatoes, Doris Key, Gause Club; Canned Beets, Nadine Wallace, Yarrellton Club; Dewberries, Edith Harwell, Maysfield Club; Carrots, Marie Mertz, San Gabriel Club; Canned Plums, Martha McLane, Ad Hall; History and Record Book (Garden & Clothing Co-operator), Flora Schroeder, Sharp Club; History and Record Book (Clothing Demonstrator—Garden Co-operator), Marie Mertz, San Gabriel Club. Second Place: Dewberries, Edith Ruth Powell, Ad Hall Club; Tomato Juice, Shirley Cryer, Val Verde Club; History and Record Book (Garden Demonstrator and Wardrobe Co-operator), Cora Mae Johns, Clarkson Club. Third Place: Fig Preserves, Betty Guay Powell, Ad Hall Club; Canned Pears, Lydia Schroeder, Sharp Club; History and Record Book (Wardrobe Demonstrator and Garden Co-operator), Lydia Schroeder, Shary Club.

The Women's Home Demonstration Council also received $8.50 in cash from the educational exhibit on a correctly equipped closet which they set up at he Temple Fair.

All together, the Milam County products received $24.75 in cash from fair premiums.

The 4-H Club girls of Milam County are going into business this year; thei rbusiness is balancing their clothing budget. To do this they are proceeding as any other business person would. First, by taking stock of the clothes they have on hand with the condition they are in and then making a written inventory of what they find; second, by making a written plan of the clothing they will need to buy this school year; and third, by keeping a record of all purchases made with the amount spent for them.

It is on the basis of their inventory that they know what clothes they will need to buy this year. These girls who kept expense books last year are able to tell from these records the quantity of clothes it will take for them in a year; the rest of the girls are estimating the quantity from—memory. By making a written plan for the clothes they need to buy, they feel that they will be able to take advantage of sales more wisely, to distribute the money evenly among their different types of clothing, to buy more easily, clothes that harmonize in color, type and texture, that they need and can use.

The financial record they keep of the purchases made will show the quantity of clothes it takes for them, the amount they need to set aside for clothes each year, which brand of clothes wear longer, and what unwise purchase they have made. Another point which will be of interest to their parents is that it will show them how much they are going to have to help at home in order to be worth what they are costing.

Savings for Rainy Day Pay Auto Fine

Chicago.—Morris Brown, twenty-three years old, of Oak Park, believes in saving for a rainy day, and it came along.

Fined $10 for speeding, Brown stepped up in the traffic court of Judge Frank M. Padden and produced neatly wrapped rolls of nickels, dimes and pennies.

"Where did you get all the change?" asked Judge Padden.

"Your Honor, I've been saving it for a rainy day," Brown replied.

"You are a frugal man and for that I will give you a 20 per cent reduction," said the judge. "Your fine will be only $8."

ETHIOPIANS REFUSE TO REPLANT FIELDS

Famine Faces Abyssinia During Next Year.

Addis Ababa.—Traders returning here from the Ethiopian hinterlands report that virtually no grain or coffee is being planted by the natives because they fear it will be confiscated by the Italians or brigands.

If Italian authorities fail to persuade them to plant their crops, traders say, famine conditions will prevail among the natives next year. In Addis Ababa native food already has more than doubled in price. Many natives are living solely on eggs.

Marshal Rodolfo Graziani, Viceroy of Ethiopia, recently named a commission to study the problem. Forceful measures are indicated.

Once the natives are assured that the Italians intend to pay them for their produce, the food shortage will be ended, it is believed. The natives ceased planting before the end of the war, when brigandage was rampant.

Foreign reports of guerilla warfare against the Italians during the rainy season are exaggerated. The natives in the unoccupied regions are not fighting against the Italians, but among themselves.

The Ethiopians have been awed by Italy's formidable war machine, and despite reports to the contrary, there is no organized resistance against the Italians. The respect which the Ethiopians have for their conquerors was shown recently when 500 Ethiopian bandits were put to flight by sixteen Askaris.

The scarcity of food, which was one of the reasons for the crumbling of Haile Selassie's army, is another factor which prevents organization of resistance against the Italians.

Italian airplanes constantly patrol the country, and the pilots report there are no important gatherings of warriors.

Rumors that a provisional Ethiopian government has been formed in the west are ridiculed here. The Gallas, who inhabit this region, evicted the Amharas before Italy annexed Ethiopia, and there is little reason to believe they now will fight for their former rulers, whom they hated.

News From Milano

Tom Kirk died at the residence of his daughter here, Mrs. Nunn, at five-thirty Friday afternoon, after a long illness. His death came as a shock to the family, as he seemed in better health that day than usual. He was 85 years of age. He leaves nine children to mourn his passing. He was buried in the Liberty cemetery Saturday afternoon at 4 o'clock and a large crowd attended his funeral.

J. P. Ferguson, son of Mr. and Mrs. Lloyd Ferguson, fell one day last week while playing football at school and broke his arm. An X-Ray disclosed a badly crushed elbow.

Mrs. Elam who has been sick here at her home is improving nicely.

Mrs. J. D. Peeples, Sr., has returned home after a month's visit with her daughter, Mrs. John Burns in Austin.

John Brennan of Loredo is a guest in the home of his mother here, Mrs. N. Brennan and to visit his sister, Mrs. Manley who is sick there.

Mr. and Mrs. Yardley, mother and children are visiting in Ben Arnold this week.

Mr. Horace White has returned home from Louisiana where he had been looking after business interests.

Milano school will not be dismissed this year for Armistice Day the board of trustees decided as three days will be taken off in November. November 17 the school will go to Centennial and November 26 and 27 will be taken off for Thanksgiving.

With morning . . .
came the repair crews

An early snow, drifting down from leaden December skies, froze to telephone poles and lines. Hard on its heels came the wind. Ice-laden wires snapped and poles splintered before the blast.

Night found scores of towns throughout the storm region handicapped by crippled telephone service.

But, with the morning, came the repair crews. Hastily gathered from regions untouched by storm, they poured into the stricken area with trucks, tools and materials. Day and night they rushed the work of reconstruction.

* * *

One advantage of the Bell System's far-flung organization is this: When disaster flattens the telephone system, men and money and materials are instantly available for the prompt repair of the damage.

Missions

(Continued from page 1)

stirring story of the forward march of Texas under six flags. This afternoon in presenting the three markers, which to Milam county shall show for future generations the location of the early Missions in this county, we recognize their phase of Texas history, as she marched underneath a banner that is not usually with her six historic flags. "The Banner of the Cross." It was from the cross of Christ that the early missionaries received the courage to preach and teach the faith of Christ in the early colonization days of the Lone Star State of Texas.

Missions Were Schools

In reading the story back of the Missions we were thrilled, but it is well to remember that the Missions were schools before they were churches. A mission is primarily a center for religious instructions, it is only secondarily a church and a home for the Missionary. It is well for the student of history to understand that the Indian of yesterday underwent a long period of probation before he was enrolled under the banner of the Cross. During this period he was not only duly instructed in the truths and obligations of Christianity, but he was carefully and thoroughly trained to the arts and sciences proper to civilization. Remember it was Indian hands taught by the Padres, and trained to the crafts of civilization which fashioned that historic shrine in San Antonio known to the world as the Alamo.

Pioneered Education

The mission schools, consequently, are an integral part of the history of education in Texas. Permit me to state this afternoon that even before a public school system was inaugurated the Church School was in the field. And, inspired with the same faith as the padres of old, religious men and women have dedicated their lives in works of mercy and also in the field of social service. For ages the church has stood as the defender of the domestic virtues; she is the underlying foe of all that saps society by attacking the foundation of the home. Today, as in the past, the church continues to preach the claims of social justice and social charity, defending the right of private ownership, but insisting as well upon the laborer's right to a just share in the fruits of his toil. The church having witnessed the rise and fall of Empires, she correctly diagnoses the ills of this modern age, and indicates the remedies which alone can save us. "Lord save us lest we perish!" cried out the voice of the Prince of the Apostls on the Sea of Galilee. "Lord save us lest we perish" cries out the church tody and unless her voice be heeded, our civilization today must perish utterly from the face of the earth. Every Christian knows that charity, neighborliness, must be all embracing, that every man who has a soul to save, and a mind to be illumed by the brightness of your intellect is your brother, and that man's need is your obligation of Christian service which must not be prejudiced by the hue of his skin or the accent upon his stuttering tongue. Every Christion realizing the binding forces of civic duties, understands that he must love his Country after hs God, and be willing at all times to sacrifice even his life for his faith in God or in defiance of his fatherland.

Texas Grows

Texas is a rich land and a prosperous one, but she becomes truly richer still, not as the cotton whitens, or her cattle multiply, or her oil floods the land, but as her spiritual assets grow. Texas boasts a great people and a kindly people, but she may boast a greater people and a still more kindly one in proportion as they work together for God and neighbor. The "Calvacade of Texas" marches on. Thou shalt love the Lord thy God with all thy heart and with thy whole soul and with thy whole mind." This is the greatest and the first commandment. And the second is like to this, "Thou shalt love thy neighbor as thyself."

Symbol of Americanism

The missions may crumble and the monuments fall; records may perish, and decay; but as long as Texas is Texas she shall proclaim the Christian conquest of a glorious land. We need the spirit and the courage of the early missionaries today, when the world is divided into 2 camps, that of Christianity and of Paganism. The United States either will remain within the fold of nations governed along Christian lines, or it will fall into slavery under the merciless attacks of Communism. True Americanism is symbolical of the teachings of Jesus. This nation was founded by Americans seeking religious freedom under democratic government. This principle is the soul of the United States. The Constitution of the United States is a working symbol of Christian fairness in human relations. Communism would destroy all this with a single stroke. It would wipe from American life all semblance of Christianity. Communism has closed places of worship in Russia, Mexico and Spain. It has tortured and crucified and shot religious men, women and little children.

Markers for Civilization

These three markers placed here in this community shall remind you and your children of the faith of the early missionaries and pioneers, who blazed the trail across Texas prairies. The markers are silent reminders of Christianity and civilization. I call upon you this afternoon as Christian men and women despite the existence of a Godless philosophy in the world today to recognize them as such, namely as markers representing Christianity and Civilization.

News From Liberty

Mr. and Mrs. L. M. Westbrook has returned home from Houston.

Mrs. Alma Hilderbrandt and daughter, Mrs. John Mills visited Mrs. A. J. Hilderbrandt Wednesday afternoon.

Mr. and Mrs. Herman Glaser and family visited friends in Cameron on Sunday.

Mr. Emil Hundle of Granger is visiting in the home of Mr. and Mrs. Edd Jurca this week.

Mrs. Rose Beard of Sharp visited in the community Sunday.

Mrs. Joe Denton is visiting in Sharp this week.

Mr. and Mrs. Garrett Beckhausen and sons, Wilburn and Garrett, Jr., returned Saturday from a visit at the Texas Centennial at Dallas.

Mrs. Klump, Mrs. Bell and Billie Klump of Flatonia visited Mrs. A. L. Bell Sunday.

Mr. and Mrs. L. S. Svetlik gave a birthday party Friday evening honoring their son Albert. Refreshments were served to those presnt. All reported an enjoyable time.

Mr. and Mrs. Chas. Martin and son, Charles Edward, attended the Centennial Exposition at Temple Saturday.

Mr. and Mrs. Will Tyroch and son, Edd, shopped in Cameron Tuesday.

Elmo Odom visited his grandparents, Mr. and Mrs. George Odom, Sunday.

PARENT TEACHER MEMBERSHIP DRIVE

The Parent Teacher Association is endeavoring to enlist the support and cooperation of all citizens of Cameron in P. T. A. work.

Join your local P. T. A. this month by paying fifty cents to some member of the membership committee who will call on you. This entitles you to membership for one year. However, all Cameron people interested in P. T. A. work are urged to attend the meetings regardless of membership.

Came to Texas in 1852 in a Covered Wagon

By MAJORIE ROGERS
Marlin, Texas.

(Copyright, 1936, by the Home Color Print Co.)

"THE first train I ever saw was in Navasota, soon after the H. & T. C. was built through Navasota into Central Texas," said Mrs. Melvina Greer Maxwell, 90-year-old pioneer settler of Falls county, Texas.

Mrs. Melvina Greer Maxwell

Mrs. Maxwell was born in Sevier county, Arkansas, September 1, 1846, and first came to Texas in a covered wagon in 1852.

"I went to visit relatives in Navasota," Mrs. Maxwell continued, "and my aunt asked me whether I had ever seen a train. I told her that I had not. She said we would go down to the hotel and wait for it to come in, but that I must not act 'greenie,' or let others know I had never seen a train. We got chairs from the hotel landlady and sat down, facing the railroad track, to wait for the train. I was a bit frightened when the whistle blew and the train came rolling in, but I did my best not to show it. A little old wood-burning locomotive pulled the coaches. This train, compared to a modern train, was slow-going and dinky, but to me it looked grand and imposing.

"There were no good roads or bridges in those days. Most of the main-traveled roads looked like trails with lots of dense brush and tall grass on either side. We passed several 'friendly' Indian camps after entering Texas. Father made signs to the Indians and in this way tried to talk to them. They had been hunting and were on their way to Indian Territory. We saw lots of deer—great droves of them—and they were a beautiful sight as they scampered over the prairie or stood gazing curiously at us.

Dried Venison and Cornbread

"We camped for about two weeks nearby the home of John and Sarah McLennan, of Waco. They had a two-room log house on the banks of Brazos river, kept a stock of supplies in one room and lived in the other room. We bought provisions from them. They wanted us to settle in Waco, for few families lived in that part of Texas, and those who did live there longed for human companionship. Our food consisted mostly of dried venison and cornbread. We hardly knew what a biscuit looked like.

"After traveling over Texas we went back to Arkansas and prepared to move here. In the fall of 1853 our caravan of three ox-wagons and two horse-wagons set out for Falls county, Texas. My mother and father rode horseback, while the slave women and we children rode in the wagons. We brought about fifty slaves with us. Our progress was slow and it took five weeks of travel before we arrived in Falls county. There were no bridges—just fords—and swollen creeks or rivers sometimes delayed us. Our slaves killed prairie chickens, deer and other wild game along the way for part of our daily sustenance.

"November 8, 1853, we pitched camp on Pond Creek, near the town of Travis, which was not named until after the War Between the States. We were afraid the tall grass might catch fire, and for this reason camped in the bottom until we could get our log houses built. Our house was built first and then the slaves' houses built afterward. Johnson Poole, the well known Indian fighter and his family, were our nearest neighbors. They lived six miles from us.

Built With Slave Labor

"Ours was a double-log cabin with a real plank floor, the only home in that part of the country that didn't have a puncheon floor. The slaves built a frame, rolled logs up on the frame and, with a whip-saw, sawed the logs into planks for the floor. One man stood on top of the frame and another man underneath it as they sawed up and down, following the black lines traced on the logs. The other houses in that section of Texas either had dirt or puncheon floors. Large logs split in the middle and the smooth side turned up was called a puncheon floor.

"Our house consisted of a long open hall with two rooms on each side of it, the usual style of pioneer architecture. We didn't have glass windows in those days, so father cut 2x2 feet openings through the double log walls, with wooden shutters for windows, fastened to hinges on the inside. When we wished to keep the shutters open, we fastened them back to the wall by hooks. Father sent to Houston for enough nails to roof our house. In those days nails were scarce; most folk did not use nails in building houses. They used wooden pegs. To roof a house, poles would be put down across the top, rows of boards laid evenly on the poles and then big logs laid on the boards to hold them down. Holes were bored in the logs and wooden pegs driven in the holes to keep the logs from rolling off. Our house was comfortable and we liked it.

"Mother brought lots of garden and flower seeds with her from Arkansas, and we had a fine garden and some flowers. Folk came from miles around to get vegetables from us. We did our trading in Cameron.

Fighting a Prairie Fire

"We had milk through spring and summer. All cows were longhorns. I remember father bought a dressed beef for $4, and it was a large beef.

"Prairie grass was usually burned in the fall to make better grazing for cattle in the spring, and also to keep down prairie fires. While fascinating to look upon, nothing was more disastrous than a prairie fire sweeping over the country, with bawling cattle and wild game running before it.

"The hardest work our slaves ever did was fighting a prairie fire on one Sunday afternoon. I happened to see the flames leaping skyward, a mile away, and aroused father who had lain down for a little sleep. The earth had not been plowed around our fields and father was afraid the fire would burn down the fences — and maybe our home. He had the negroes set fire to the grass close to our fences and beat the fire back with brush brooms before it could spread further. When the seething prairie fire met the burnt grass around the fences, two hours later, it died out. The women helped by carrying water to the men who had become exhausted from heat of the flames.

"I happened to see the flames leap skyward a mile away."

Negroes Kill Overseer

"The only serious trouble we ever had with our slaves was just before leaving Arkansas. In those days there were 'negro traders,' who traveled from one settlement to another, selling mules and negro slaves. They would stop at a plantation and ask the owner if he wanted to buy either negroes or mules. The owner took a big chance buying from traders as sometimes they had mean negroes and the buyer would have no way to know this until after he purchased the negroes.

"Father bought two fine-looking negro men from a trader, paying $1200 for one of them. These two negroes killed our overseer. After they had confessed the killing, father held a consultation with neighbors and it was agreed that the practical thing to do was to hang them, and so they did. After this incident, father raised his own negroes.

"I had been married to Thomas Robert one year when war was declared between the North and South. He soon left me to join the Confederate army. Falls county voted for secession, and about 600 men answered the call to arms. My husband joined an outfit from Milam county and was sent to Galveston. He was detailed to drive beef cattle to Louisiana to feed the Confederate soldiers. There were thousands of cattle running wild on the Texas ranges at this time.

Wore Homespun Clothes

"My father realized that the war was coming and he sent to Houston for supplies of sugar, coffee, salt, etc. We wore home-spun clothes. The slave women did the spinning while mother did the weaving. It took lots of woven material to clothe our slaves. One negro woman kept the shuttles filled. She would run the thread on a cane quill and put it into the shuttle.

"Some of our men slaves went to Galveston to help build forts or dig trenches. Father did not think we would lose the war and for this reason tried to keep his best negro workers near home. He would not let them stay in Galveston over a year at a time.

"After the war was over, father died and mother moved the family to Cedar Springs, Falls county, Texas, which was not far from the old Tonkoway Indian village and the townsite of historical Viesca, the seat of government for the Milam district before Texas became a Republic. Later, we moved to Marlin, where I since have lived.

"Marlin, the present county seat of Falls county, was just a crossroads village when we passed through it, in 1853, to buy axes, from the firm of Green & Bartlett."

"Granny" Maxwell, as she is known over Falls county, is an interesting pioneer woman. Her mental faculties are unimpaired and she gets about spryly for a woman of her advanced age. She is the mother of Mrs. Sam Day, Waco, Texas; Mrs. Jeff Stuart, Bradley, Oklahoma; Mrs. Annie Mallard, Cedar Springs, Texas, and Mark Maxwell, Marlin, Texas.

Texas Postal System--1836 to 1846

By GLADYS SANDS
East Bernard, Texas.

(Copyright, 1936, by the Home Color Print Co.)

A CENTURY of progress in the Texas postal system would be interesting reading. However, this story reviews, chiefly, how mail was handled during the days of the Republic—from 1836 to 1846.

One hundred years ago, before Texas was annexed to the United States, post-riders carried the mails between San Antonio and the viceroy of Spain, in Mexico City. Mail-carriers were mostly Indian runners, weather-hardened and of great physical endurance. These Indian runners were as fleet as horses in transporting mail, according to Harry M. Konwiser, in his book on "The Texas Republic Postal System." Later, when correspondence became more general, a Mexican riding a pony and leading another pony, with mail bags, was the method of transportation.

Letters in the archives of the University of Texas reveal considerable correspondence between Stephen F. Austin and Mexican officials concerning American colonists. Mail destined for other points than Mexico was usually carried horseback from Texas to Louisiana, or Mississippi, and forwarded to its destination from those States.

Records of earliest Texas postal delivery show a single sheet manuscript, one side of which was used for correspondence and the other side for the address and postal markings, handstamped for postage, and paid for by the receiver of the letter. No envelopes or printed stamps were in use at that time.

Texas' First Postal System

Stamp catalogues of today contain none of these postal covers (single sheet letters folded in the center) and few, if any, are known to exist, except in the University of Texas archives.

The first regular postal system for Texas was inaugurated December, 1836, during the Presidency of General Sam Houston. John Rice Jones, a boyhood playmate of Stephen F. Austin in Missouri, having had previous experience as a postmaster, was appointed postmaster general of the Republic of Texas, but the Republic had no finances and no equipment with which to establish a postal system.

In the hope of overcoming this difficulty, the first Congress of Texas passed an act authorizing the postmaster general to solicit funds from the public and to require that all mail carried on routes pay one-third of its expense.

There were handicaps to this plan. In the first place, the receiver of the letter paid for transporting it, unless the destination was out of the State. Price for delivery of a one-page letter over a distance of 50 miles within the State was six and one-fourth cents. Magazines and pamphlets were one cent a sheet. If a voluminous correspondent wrote several pages to a friend 200 to 300 miles distant and the friend was unable to pay transportation charges upon arrival of letter, the Texas postal system was out that much money.

NACOGDOCHES
1832
A "letter cover" addressed to Stephen F. Austin and mailed at Nacogdoches, Texas, in 1832.

Mail-Carriers Paid in Land

The letters that did go through the mail and were paid for by recipients were far too few to pay postal expenses, and in 1837 the Texas Congress had to do something about paying off a year's salary to the mail-carriers. Texas was rich in land, so an agreement was entered into whereby anyone having an account against Texas for the carrying of mails might take it out in land at 50c an acre, if and when taken out in tracts of less than 350 acres and in the form of a square.

It was about this time that the Texas Congress appropriated $1,000 to assist mail deliveries, the first appropriation of this kind for the carrying of mail in Texas.

Financial worries were not the only drawback to this early postal system. Roads were bad, bridges few, and highwaymen lurked in out-of-the-way places, ready to rob the carrier at some lonely spot.

The first time a highwayman was caught robbing the Texas mails he learned a lesson. Penalty for the first offense was ten years in prison, but if caught in the unlawful act a second time the penalty was death.

Gradually more money was appropriated by the Texas Congress for postoffice purposes. By January, 1839, $50,000 had been set aside for the carrying of mails, and a great number of new routes established.

Early Mail Routes

Among these early routes, says Konwiser, one route began at San Felipe de Austin in what is now Austin county, and extended to Cantonment Jessup, then on to army headquarters at Bexar, now Brazoria county. Another early route covered the distance of 118 miles from San Felipe de Austin to Robbins, now Houston county. A lone mail-carrier, horseback, could usually travel this 118 miles in three days. Other post-roads were gradually established and rates lowered as postoffice receipts became greater.

Records show no postage stamps of this period other than those supplied by the hand-stamping of the postmaster or the mail-carrier. Postal catalogues show no prices of Texas stamps earlier than 1861 to 1865. During days of the Republic, mail-carriers wrote the amount of postage paid on a letter after the receiver of letter had paid the fee, which was required in the form of gold, silver, or exchequer bills of the Republic.

After entering the Union, Texas was partly relieved of responsibility of mail delivery, the State postal system becoming a part of the regular postal system of the United States. Under the national system, longer routes were established and much of the mail carried in stage coaches. One of the longest routes was from El Paso, Texas, to San Diego, California. Stage Coaches carried passengers as well as mail.

During the War Between the States, almost every small town had its postoffice and when the Confederacy took over the mails in seceded States, authorities could not supply enough stamps to meet the demand. As a consequence, there were few stamps for mailing of letters.

The pale blue bust of Jefferson Davis, which distinguished the most common type of Confederate stamp, is absent from many Texas-mailed letters of the Civil War days. In its place one finds penciled or ink markings on letters of that period. Many of these are so rare and unusual that price quotations in stamp catalogues are inviting to stamp collectors.

Goliad Stamps That Are Valuable

The little garnet square of Goliad, with the name of the town spelled out and a 5 in the center, is quoted in stamps catalogues at $1,500; and another stamp carrying the numeral 10 with the name Goliad misspelled, is listed at the same price. There are nine varieties of these Goliad stamps, all of them valuable.

The reddish brown Victoria stamp of this period, bearing the number 5 or the green one with a 10, are valued at $700 to $800, respectively.

From Gonzales comes, perhaps, the quaintest Texas stamp on record. Its history goes back to the Confederacy when John B. Law, of Gonzales, found himself elevated to the position of postmaster. Stamps being scarce, he used for a postal label one of the advertising stamps of the drug store and book shop which he operated. As a rare specimen, the Coleman and Law stamp, found on letters or on covers of old books, is today valued at $1500 in stamp catalogues.

The Beaumont stamp, either the square yellow or the square pink of the 10 denomination, is in the $1500 class; and the Helena edition of the early sixties, the buff 5 or the gray 10, is quoted at $1750 in stamp catalogues.

The Richmond stamp, a 5c-stamp, was printed on the envelope and is valued at from $75 to $90.

In striking contrast to this slow delivery of mail when Texas was a Republic, is the efficient system now prevailing. For example, an air-mail letter sent from Dallas or Fort Worth to New York City, is delivered there 10 hours after mailing; from Houston or San Antonio it is delivered in 12 hours. The same letter by rail is delivered in 40 hours. Back in 1836, a letter from Texas to New York City, if delivered at all, would require from eight to ten weeks to reach destination.

But he that is joined unto the Lord is one spirit. I Cor. 6:17.

The Beaver Problem

A farmer near Great Bend, Kansas, has a problem on his hands. A colony of beavers is gnawing down his cottonwood trees, but he cannot shoot or trap the animals because that is against the law.

The beaver, cousin of the rat, played a great part in pioneer commerce. In the absence of money, its fur was used as a medium of exchange.

Beavers dam streams with trees which they cut down on the banks, tow into position, and plaster together with mud. Behind the dam are several dome-shaped lodges, each of which may house as many as 12 old and young beavers.

The animals work mostly at night. Their chief food is soft bark. Trees are felled and the branches, cut to suitable lengths, towed to the water and sunk near the lodge, one end stuck in the mud. When the bark has been stripped off, the branch is added to the dam.

Engineers say that a beaver dam is better built than a dam of the same material built by human hands. It will withstand any ordinary flood of water.

How Shot Pellets Are Made

Pellets of shot for shotguns are usually made in shot towers about 200 feet high. Molten lead is dropped through a sieve, or drop pan, at the top of the tower to a tank of water at the bottom. The falling liquid assumes the shape of a raindrop and hardens when it hits the water. The shot is then polished by rotating it in a barrel with a kind of carbon called graphite.

Of making many books there is no end; and much study is a weariness of the flesh. Eccl. 12:12.

CURRENT (EDITORIAL) COMMENT

By R. L. PASCHAL
409 E. Weatherford St., Fort Worth, Tex.

(Copyright, 1936, by the Home Color Print Co.)

Baby Shows

BABY shows should be joyful occasions. They are always so at the start, but may end in gloom or something far worse.

September 19th, they had a big baby show on Coney Island, N. Y. More than 300,000 spectators looked on as 400 proud, beaming, hopeful mothers paraded their babies up and down the beach that the judges and the great throng might admire them. The weather was balmy—just right for babies—dressed as they were in the scantiest of costumes, so as to display their fine points to best advantage. Many floats, beautifully decorated, were in line. Joy was unconfined, all went merry, until the time came for the judges to announce their decision. As the awards ended, gloom took the place of joy among the mothers at the wretched taste of the judges. Anger flared up. Many things were said not in the least complimentary to the judges, although the poor judges did their best to render a fair and impartial decision.

There are some things a wise man never does—and one less wise only once—that is, to act as judge at a baby show.

* * *

Illiterates in High School

When is one illiterate? Dr. J. L. Tildsley, assistant superintendent in charge of the high schools of New York City, answers the question as it applies to the pupils under his charge as follows:

"A boy or girl has to be regarded as illiterate who cannot read the ordinary textbooks—history and so on—which are necessary to education in a high school; who cannot express ideas in writing; who cannot work out, let us say, operations with common fractions and decimals."

He says that there are 50,000 of these illiterates in the high schools of New York City. Of 5,000 freshmen, about 14 years of age, almost one-fifth of the whole number are illiterate. It is claimed that this proportion holds in other cities of the country. Possibly so. We recently heard the complaint from a city librarian that many of the children who patronized the library could do little more than look at the pictures—that reading with understanding was beyond the ability of many 12-year-old children. One of the best teachers of arithmetic I have known said that children could not solve problems because they could not read them.

Dr. Tildsley assigns the following as causes for this deplorable condition: Classes of thirty-five to forty-five and even fifty; improper methods; the pressure on teachers to promote pupils who do not know the work, and multiplication of the instruments of education—opportunities for self-expression and self-development — taking away the child's attention from the essentials. It is no kindness, so it is argued, to give a child this wide range of subjects and then allow him to neglect reading and arithmetic.

We wonder whether our high school pupils in the Southwest are less illiterate than are those of New York. Is it possible that one-fifth of them cannot read with understanding and are unable to perform operations involving fractions? We hope superintendents will test their pupils to find out.

* * *

Trouble in Palestine

Something like civil war prevails in Palestine—the Palestine of Bible history. The native Arabian population resents very keenly the influx of Jews that have come to make their home in the land of their ancient ancestors. There have been a few skirmishes between small bands, and sniping at Jews seems to be a frequent Arab pastime. As the numbers of Jews increase, there will probably be increased hostility on the part of Arabs, resulting in more violent outbreaks.

Great Britain, which has a mandate from the League of Nations for Palestine and the region across the River Jordan, has many soldiers in these countries, who can easily put down any general uprising of Arabs, but who cannot altogether suppress sniping.

* * *

Referendum on War

At the time America entered the World War there were a few who said the question of our participation in that or any other war should be determined by a national referendum. After the war was over, those who held that opinion grew more vocal. There is now strong sentiment in favor of a referendum.

Recently the Institute of Public Opinion took a nation-wide poll on the question: "In order to declare war, should Congress be required to obtain the approval of the people by a national vote?"

More than 71 per cent said "Yes." Those of all occupations voted in the affirmative. Of the women, 81 per cent voted in the affirmative.

Some comments in favor of the proposition were:

"I'm a mother. I'd rather vote on my boy's future than leave it to Congress."

"It's the people who fight—not Congress."

"Congress shouldn't send them to death without asking them first."

Those against a referendum had also something to say:

"If Congress doesn't know when to declare war, God help us."

"The delay might be dangerous."

"The method in use at present has worked satisfactorily."

The responsibility of declaring war is placed on Congress by our Constitution, and a change in it will be necessary if we are to leave the question to a vote of the people.

As the vote would indicate, our people would avoid war if it were possible so to do honorably. Nor are we different in this respect from people of other nations. We are better off than they, however, for they look upon war as inevitable. A traveler recently returned from Europe reports that in every country he visited the people never say, "If war comes," but always, "When war comes."

For many years our people have wished for peace, and our government, whatever party has been in power, has truly represented them in this attitude. At this time we are fortunate in having a peace-loving man as Secretary of State. He has recently said:

"Our task is to formulate out of the wishes and wisdom of a popular democracy a sound foreign policy which will insure peace."

Personally, we believe that if we are careful to select wise, cool-headed men for Congressmen, we can safely leave the question of peace and war to them.

* * *

Child Labor

A little boy lay dying. His weeping parents told him that he would soon go to heaven and be with Jesus. He gasped, "I don't want to go to heaven. I want to play." The poor little fellow spoke for all normal children.

"All work and no play makes Jack a dull boy." Equally axiomatic it is to say, "All play and no work makes Jack a selfish boy." No child is worse for having some work suitable to his age. He should early in life have definite things to do in and around the home, and these responsibilities should be increased with increasing years. In no other way can the feeling of obligation and duty be so well developed.

Certain schools of philosophers, and even teachers who base their methods on this philosophy, would strike the word "duty" from their vocabulary and appeal to the child only through his interest. But strong men and women, able to do the world's work bravely and well, will never be developed in any such way. Some of these psychologists demonstrate that if a child is required to do anything against his will he is in great danger of being driven insane. We respect philosophy when it is in accord with human experience, but we know that all these philosophers are wrong, for human experience throughout the ages has been against such absurdities. Even now, there are spoilt children, horrible examples of the effects of such a philosophy put into practice, in every neighborhood.

The boy on the farm would rather hunt rabbits than go to school; rather go fishing than set out onions, cabbage plants or sweet potato slips; rather play marbles than weed the garden; rather play baseball than chop cotton; rather hunt squirrels than pick cotton. To make it harder on him, he sees other boys in the neighborhood doing these things and wonders why his daddy keeps him at work when some other boys are having a good time. Later, he would like to drive the Model-T to town than to drive the cultivator from one end to the other of the rows. But all these things are good for him, and he begins very early to take an interest and a joy in them and a pride in doing them well. He gains that feeling of proprietary interest in the products of his labor which is so essential to the stability and welfare of our social and economic order. While there should be time for play and recreative pursuits, yet, by reason of his work, a boy will find more zestful joy in them.

The child in the city is not so fortunate. There is no wood to cut and get in; no water to draw; no cows to milk and pen; no hogs and chickens to feed —nothing but play unless he can get a job outside the home. Fortunately for the girls there are still floors to sweep, beds to make up, and dishes to wash. These things help to develop in the girls a feeling of duty, responsibility and obligation, which is reflected in their school work. The average city girl is a better pupil than her brother.

Just as surely as work on the farm and in the home, if in reason, is beneficial to any child, just so surely is work in factories injurious, especially to those of tender years. The hours are often too long. There is dust in coal mines; there is fine lint in the air of cotton mills, and both of these get into the lungs of immature children workers and often ruin their health.

It was to protect children from the exploitation by some—not all—industrialists that the Child Labor Amendment was submitted to legislatures by Congress. In our judgment, it is too drastic and would defeat its own ends. If it were rewritten, shorn of its objectionable features, and re-submitted to the legislatures, there is little doubt that it would be ratified speedily and become a part of our Constitution.

* * *

Bill Collectors

The bill collector's lot is not altogether a happy one. He has a fine time when people are ready and willing to pay, but he finds some who are out of funds and others who will never settle their accounts if they can get out of it. He is the victim of the errors in judgment of the credit man. There is no one at home when he calls; he wonders why so many men have to be out of their offices so much of the time about the first of the month. He hears all kinds of hard luck stories; at times he has to take tongue lashings from angry women. Doors are slammed in his face. Recently, in Fort Worth, the action of the courts was successfully invoked to keep a money-lender from annoying by repeated and frequent telephone calls a man to whom he had lent money.

The white man makes the bill collector's life something far different from a bed of roses, but he can take lessons from the noble red man. From Los Angeles comes the story of a bill collector who returned to the office with painful wounds about the head and much the worse for wear and tear. He said that he had asked an Indian chief to pay a bill of $16, and that the chief had tried to scalp him.

* * *

Causes of Suicide

Almost every conceivable reason has been given by those who have made away with themselves or have attempted to do so. Unrequited love, unemployment, business failure, loss of friends and loved ones, despondency, disgrace, loneliness, are among the more common reasons. Whatever the reason, it must be strong and impelling to the suicide, however trivial it may seem to us.

We have all heard of the old woman who explained her unsuccessful attempt to kill herself by saying that she was tired of "buttoning and unbuttoning." A few days ago a man fished out of the Chicago river by two bridge attendants gave this explanation for his leap: "Since 1908 I've been an elevator operator. Recently my employers forced me to wear a uniform and the cap hurt my head, so I figured I'd be better off dead."

Wealth, success, happiness — why should these cloy? Maybe the pursuit of these things, not their attainment, is what satisfies. In the same newspaper that carries the story of the elevator operator, Robert Ripley in his "Believe It or Not" tells of a Mexican who attempted suicide because he was too happy. He said: "I am an unfortunate person—I am happy—rich—have a good wife—good health—wonderful friends —all that I desire—there is nothing more to live for."

Factors in the Business Woman's Success

Up in New York the National Business and Professional Women have been collecting data from 212 successful business women about the reasons for their success.

Age seems to be no handicap; all but eleven of those interviewed were past 30 and 138 were over 40.

Dress was rated high as a business aid. Some stated that they had radically changed their dress and appearance, and they considered this change responsible for their promotion, while all agreed that dress is an important factor in securing and holding a position.

One told of losing a job. She went to a beautician, got another position, and is sure that looks helped greatly.

Another said: "I believe in a neat, well-groomed appearance—one that gives the impression that you are doing your work because you like it."

A third reported: "I have studied my own general appearance—dress, hair, posture and behavior. I have improved my speech."

Many of the older women stressed "more permanent waves, more dignified dress, neat, modern—not youthful—clothes, good speech habits, care of health, development of personality."

Some of the younger women were so convinced of the value of good speech that they had put themselves into the hands of a specialist in that subject.

It is said that the American business woman dresses better than does her sister in any other country. A common requirement is that she shall be a graduate of a high school. Many of them have had training in special schools, and some are college graduates.

* * *

The Female of the Species

Kipling assures us that "the female of the species is more deadly than the male." He also tells us that "the Colonel's lady an' Judy O'Grady are sisters under their skins!" This is only another way of saying that the most civilized people have a good deal of human nature in them, impossible to eradicate by all the conventions of society.

The ancient poets and historians tell us of the Amazons, more than a match for warriors who were mere men. Back in the time of the Judges the men of Israel were too chicken-hearted to resist a cruel invader of their land. A woman, by the name of Deborah, summoned the clans to battle and led them against the foe; she put the enemy to flight. Another woman, named Jael, made away with the leader of the invading army, Sisera, by driving a spike into his temple while he was asleep in her house, a deed celebrated by Deborah in a song known to everyone that appreciates good literature.

But we are not thinking of women of ancient times as we search for examples to establish the truth of Kipling's sayings. The accounts of the battles in Spain tell that the women on the government side cannot be kept from the battle lines in their fierce desire to slay their enemies. These women probably belong to the peasant class; they are of the emotional, hot-blooded Spanish race.

Man-Eating Sharks

The story of a near-tragedy in the South Seas was told the other day when the steamer Hauraki docked at San Francisco. The vessel had on board 17 persons who had clung for two days to a capsized schooner between the islands of Apia and Pago Pago in the Samoan group, while hungry sharks circled about.

It is a miracle that they survived, for the sharks of the South Seas are notorious man-eaters. They often follow boats and canoes at night, nipping at the oars and paddles and sometimes tearing them away from the hands of rowers. There are authentic cases where large sharks have even capsized canoes to get at the occupants.

One such incident occurred several years ago, when 40 natives, crossing in canoes at night between islands several miles apart, were caught in a squall. One of the canoes was swamped and the occupants were seized by sharks which had been following the fleet of boats. A few minutes later great numbers of maddened sharks were seizing the outriggers and swamping the canoes to devour the occupants. Only two natives escaped to tell of the horror.

One of the largest, swiftest and most voracious of man-eating sharks is the great white pelagic, which sometimes reaches a length of 40 feet in tropical waters, according to the encylopedia Brittanica. Its teeth are large, triangular with sharp serrated edges. The tiger shark is another large vicious man-eater. All sharks, however, are not of the man-eating species.

Huge Beehive

What is believed to be the largest beehive in the world was found not long ago in an Australian forest. It measures 21 feet across, is more than 36 feet high, and weighs almost a ton.

The hive is the home of a vast swarm of Tasmanian black bees, which manufacture a special honey valuable for medicine. It is located in the top of a huge eucalyptus tree. The honey removed from it—7,000 pounds—is said to be worth several thousand dollars.

When Men Wore Long Whiskers

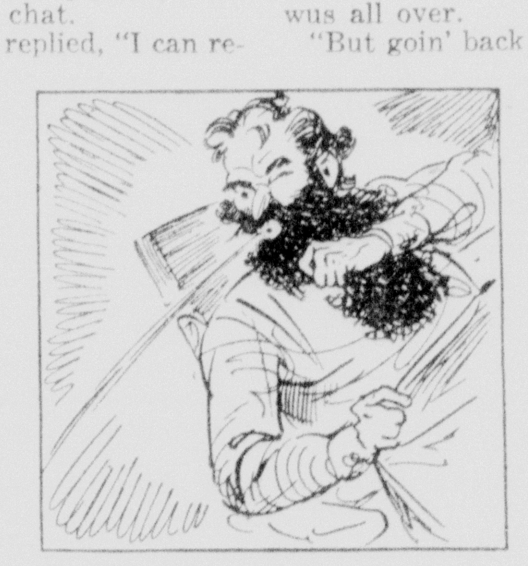
By JOE SAPPINGTON
522 Sedwich Ave., Waco, Texas.

(Copyright, 1936, by the Home Color Print Co.)

"SAP, don't you remember when nearly all men wore long chin whiskers?" said Uncle Jeff Huggins, as he lit his pipe and sat down for a neighborly chat.

"Yes, Uncle Jeff," I replied, "I can remember as a boy when most men wore long chin whiskers."

"Well," continued Uncle Jeff, "it sure is funny nowadays to look back at a time when men wore sich things. Some whiskers wus so long they had to tuck 'em inside the shirt bosoms an' carry little pocket combs to comb out the tangles. Tobacco chewers had a terrible time tryin' to spit clear o' their beards an' sometimes they didn't. It jest shows whut style can do. Nobody in perticular liked beards, but it wus stylish to wear 'em an' they wore 'em.



"Tobacco chewers tried to spit clear of their whiskers."

Looked on as Sissy

To go 'round clean-shaved wus looked on as sissy. Even long mustaches wus poplar. My Uncle Ben had a mustache so long that when he cume to our house an' et soup he held the ends o' his mustache back with one hand an' the soup-filled spoon with t'other hand. He drunk coffee the same way—and sometimes the coffee an' soup would get mixed up an' he'd have to stop an' wipe off his mustache.

"I often wonder why men ever bothered with sich things jest to be in style. Reckon they wanted to attrack the women by wearin' long mustaches then same as the women want to attrack the men by wearin' short skirts now.

"O' course," chuckled Uncle Jeff, "there wus some kissin' in them days, but whut puzzles me is how a girl could kiss a man with a big mustache. She must o' been mighty tickled when it wus all over.

"But goin' back to chin whiskers, Sap, I believe it wus my pa that fust started the style o' cuttin' 'em off. It happened this way: Pa's whiskers reached nearly down to his suspender buckles an' he had a' awful time keepin' 'em straight. Ma never did like whiskers an' wus always naggin' pa to cut 'em off, but pa wouldn't do it 'cause he knowed all his friends would laugh an' poke fun at him if he did.

Determined Kind o' Woman

"Ma wus good-hearted but a determined kind o' a woman, an' when she saw pa wusn't goin' to cut off his whiskers she made up her mind to do the job herse'f. So one day while pa wus takin' a nap she slips up an' cuts his beard off close to his chin. She done it so quiet that he never woke up. When through takin' his nap, pa puts on his hat an' goes to town. So fur he had not missed his whiskers.

"The fust friend he meets laughs, an' says, 'Hello, Bill, ain't you 'fraid you'll ketch cold?' an' passed on. Pa never 'spicioned whut his friend wus drivin' at an' kep' on walkin' down the street. Purty soon he meets another friend that smiles and says, as he passed on, 'Bill, you'd look a heap better if you plowed under that stubble.'

"Still pa didn't ketch on, but knowed somethin' wus wrong. While tryin' to figure it out, he meets a old pal by the name o' Gus Withers. Gus noticed folks laughin' at pa an' knowed whut they wus laughin' 'bout, so he takes pa by the arm, leads him to one side an' says: 'Bill, they're laughin' at you 'cause you cut off yo' whiskers.' Pa looked 'sprised, put his hand to his chin an' then said right out loud, 'Well, I'll be damned!'

Pa Wus Mad at Ma

"Pa wus mad at ma fur a week an' barely spoke to her. Then he got in a good humor agin an' promised her he'd never wear whiskers no more.

"Pa looked better without his long beard, after he'd shaved. He wus a fine-lookin' man an' his beard kivered up his features. As I said before, it wus pa that started the style uv men shavin' off their long chin whiskers. In a few months most o' the men folks in our town got rid o' theirs an' stayed rid uv 'em. But for a while they looked kind o' funny goin' 'round with naked faces.

"Some men looked plumb different after thar beards wus cut off. Friends passed 'em on streets an' didn't always reckernize 'em. Jake Witherspoon, unbeknown to his wife, shaved off both whiskers an' mustache an' when he come home she thought he wus a stranger. He tried to kiss her, but she wus so scared she screamed, run out in the front yard an' fainted.

"Another time the sheriff arrested an' started to jail with Joe Abernathy, thinkin' he wus a hoss thief. Joe had jest cut off a foot of bushy red whiskers an' looked persisely like Lem Harris that wus wanted in 3 or 4 counties fur stealing mewls an' hosses.

"Purty soon clean-shavin' got poplar an' then stylish. O' course, after it got stylish you seldom seed a man wearin' whiskers."

BRIEF TEXAS NEWS---from Over the State

HAS OWNED SUIT 22 YEARS

Shorty Bass, of Kirkland, believes in taking care of clothes. He claims the ownership of a suit of clothes purchased in 1914 and which he has worn every year except the two years he served in the army.

OLD TRAIL-DRIVERS RE-ELECT

A high compliment was paid W. T. Jackman, of San Marcos, when he was re-elected president for life of the Old Trail Drivers' Association which met at San Antonio in October.

REFUSED OLD AGE PENSION

"Grandma" Sarah Jones Gillis, 109-year-old resident of the Community Home for the Aged, at Houston, refused to make application for an old age pension.

65-YEAR-OLD QUILTING FRAME

Ruf Thornton, of San Saba, has a pair of quilting frames that he says are 65 years old and were built by his father. The frames are elm and in excellent condition.

TICK-TOCK—TICK-TOCK

An 86-year-old man in Dalhart owns a 61-year-old clock. His name is J. C. Richardson. It is a Seth Thomas calendar time-piece that records days of the week, including leap years, says Richardson.

AGED HORSE AND BUGGY

C. H. Eoff, of Stephenville, can tell you something about horse and buggy days. He owns a horse and buggy which, he says, are 26 years old each. The buggy is a Hines two-seater and was bought in 1910 for $300.

MINING FULLER'S EARTH

The Dalhart Texan says: Fullers earth bed has just been opened near Plainview, and will be commercially mined. The Cosden Refining Company, of Big Spring, has contracted 54 tons for filtering out oil impurities.

HAD NEVER RIDDEN A TRAIN

A news item chronicles the recent death of Mrs. Jane Isom, 87 years old, of Blossom, Lamar county, who died without ever having ridden a train or having been outside of Lamar county. She was born in 1849, in a community south of Paris, Texas.

HAS COLLECTED 1600 SONGS

Buster Collard, business man of Graham, has a complete bound volume of 1600 songs which he has collected over a period of seven years. He expects to continue collecting songs, which began as a hobby, and is now at work on his second volume.

GRAPEFRUIT TREE TO ISLE OF MALTA

A Rio Grande Valley grapefruit tree has been shipped from Texas to Sizeleigh castle, the home of Lord and Lady Strickland, on the Isle of Malta.

The Texas grapefruit tree, it is believed, will flourish in the Malta climate.

DUCK DROWNS

While it is odd for a duck to drown, yet during a 12-inch rainfall at San Angelo a duck belonging to Raymond Bennett drowned in his front yard, says a press dispatch. That reminds us that a fish also can drown unless it comes to the surface of the water every once in a while for air.

ENGLISH WALNUTS GROWN IN SOUTH TEXAS

English walnuts raised by Orville Lee on his ranch in the Carta Valley community, near Del Rio, are on display in the Del Rio Chamber of Commerce.

The nuts, well developed, grew on a 4-year-old native walnut tree on which buds of English walnuts were grafted.

SEA BEANS LIVE LIKE SEA ANIMALS, SAYS SCIENTIST

"Sea beans live in the ocean just like any other sea animal," declared Dr. Hal B. Parks, head of the science department at Corpus Christi Junior College, in explaining the life and habitat of the plant which frequents the Gulf Coast from Brownsville to Florida. The beans have no food value for humans.

TRIPLETS NAMED FOR PRESIDENT ROOSEVELT

Triplets born to Mr. and Mrs. W. S. Shaw, of the Knott community, 25 miles north of Big Spring, were named Franklin, Delano, Roosevelt.

"Franklin," at birth, weighed 5 pounds, "Delano" and "Roosevelt" 5½ pounds each. The Shaws have eight other children.

PROPERTY OWNERS ENROLL

Approximately 260 members have enrolled from Wichita Falls in the Texas Property Owners Association, according to A. T. Bryce, membership chairman for Wichita county.

The organization in Fort Worth has a membership of 4,000, and the Houston club from 4,000 to 5,000 members.

Reports from regions over the State indicate that the 20,000 membership goal will be reached by December 1, the deadline, says Bryce.

TABLE TOP FROM MANY LANDS

William Geisert, 606 Barbee Street, San Antonio, has built a table top of 85 pieces of onyx stone, gathered from all parts of the world. He was occupied a full month in building the top.

DIG UP MASTODON SKULL

A mastodon skull that weighed 700 pounds was dug up by two boys on the Sebits' ranch, near Higgins, (West Texas). The skull is now on exhibit at Canyon and is regarded by scientists as a rare find.

OLDEST METHODIST DIES

The oldest member of the Methodist church in Texas, Mrs. George W. Walling, age 98, of Austin, died September 25. Born near Lebannon, Tenn., she had been a member of the church 91 years, joining at the age of 7.

21-YEAR-OLD EDITOR

James Bradley Engledow, 21, editor and owner of the Thornton Hustler, is believed to be the youngest editor and publisher, and the youngest lawyer, in Texas. He recently received his certificate to practice from the Texas Supreme Court.

CONFEDERATE CANNON UNEARTHED

In constructing the Orange county courthouse the end of a Confederate cannon was found protruding from its position surrounded by earth taken out in excavations for the new building.

The old cannon was brought to Orange 30 years ago from Jasper.

PROLIFIC MOTHER SNAKE

The Yoakum Times says that when the automobile of Mr. and Mrs. Charles P. Steffler, of Rockport, ran over a large rattlesnake, the couple got out of the auto to investigate and found 25 baby rattlers, ranging in size from 2 to 6 inches, wrapped around the dead mother snake.

TEXAS PIONEER 103-YEARS OLD

Mrs. Melvina Ingle Chessher, of Jacksonville, recently celebrated her 103rd birthday. She was born at Jasper, Alabama, three years before Texas became a Republic, moving here in 1854.

Mrs. Chessher has about 150 descendants, including great-great-great-grandchildren. She attributes her long life to simple living, moderate habits and plenty of work.

QUICKSILVER FROM BIG BEND

About 300 flasks of quicksilver are being shipped monthly from the mines of the Big Bend section, one of the two areas in the United States producing quicksilver. The other field is in California. About 19 carloads were shipped from the Big Bend last year, 14 carloads from Marathon and five from Alpine. A carload is equivalent to 300 flasks and a flask weighs 100 pounds.

NUMBER PILOTS AND AIRPLANES IN TEXAS

There were 793 pilots and 362 airplanes in Texas holding active Department of Commerce licenses on October 1, the Bureau of Air Commerce announced recently.

In addition, there were in the State 164 unlicensed aircraft and four gliders.

On October 1, there were 15,763 pilots and 7747 aircraft in the United States holding active Department of Commerce licenses.

DOG RIDES FIRE-TRUCK TO ALL FIRES

Dallas Dispatch: "One of the oldest Dallas fire department 'veterans' in line of duty is 'Rags,' just a stray dog that joined Engine Company No. 1 15 years ago. 'Rags' hasn't missed a fire call at the station at Ross Avenue and Leonard Street since she appeared one morning a decade and half ago, lost, hungry and seeking a place to stay.

"When the fire bell rings 'Rags' leaps upon the seat alongside the driver and rides the fire-truck to and from all fires."

WHAT IS THE TALLEST TEXAS TREE?

No one has come forward with information as to the tallest tree in Texas. We have been told about the broadest tree but not about the tallest. So far several trees in Texas have measured 21 to 23 feet in circumference around the base. Now, let's hear from some one who will measure and verify the tallest tree.

California boasts of a giant redwood tree, standing in the Humboldt State Redwood Park, that is 364 feet tall.

900 CONFEDERATE VETS REMAIN ON PENSION ROLLS

Comptroller George Sheppard reports but 900 Confederate veterans remaining on the Texas pension rolls.

Total number of pensioners was 6,200 on September 30, of whom about 900 were veterans and the remainder were widows of veterans. A total of 5,859 drew $25 per month, 200 drew $50 per month, the allotment to married veterans, and 142, in the Confederate home, drew $12.50 per month.

There were 53 reported deaths during September,

DIG UP SKELETONS OF INDIANS

While excavating a few feet south of his barn, W. H. Voelkle, a farmer of Collinsville community, brought to the surface two skeletons, presumably Comanche Indians, as arrow heads and crude cooking vessels made of stone were found with the skeletons.

BUFFALO HAIR MATTRESS

Mr. and Mrs. Fred Hoeflin, living on Route 3, near Fort Worth, still sleep on a buffalo hair mattress, relic of pioneer days. They were guests of the Frontier Centennial Chuck Wagon dinner, given October 5th in honor of pioneers who traveled to Texas in a covered wagon.

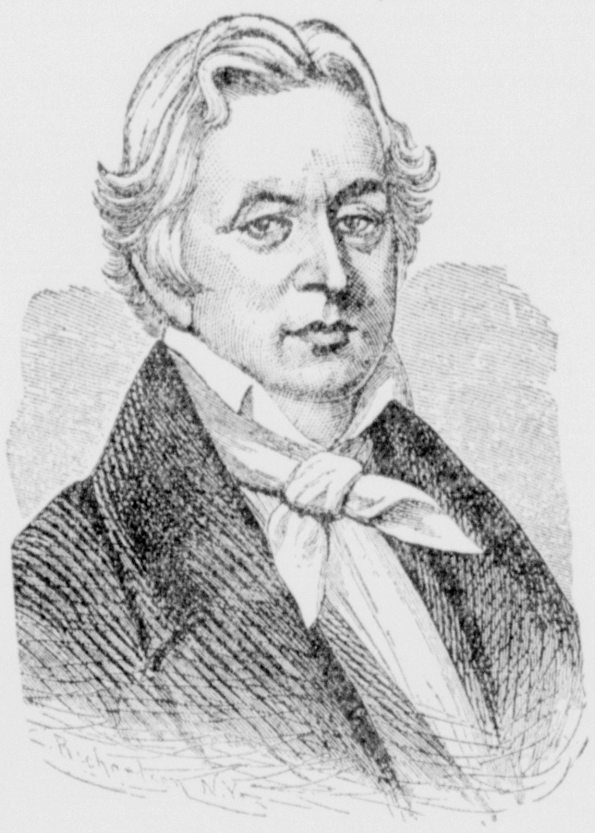
SCIENCE FINDS USE FOR OLD PINE STUMPS

Old pine stumps that clutter up land are now said to have a value, since science has found a way to extract from them pine oil, widely used in the making of disinfectants. A curious fact about pine oil is that it does not exist in the living tree, and can only be obtained from dead wood.

FIND WATCH CHARM IN STEER'S STOMACH

Two years ago B. F. Huntsman lost a Masonic watch charm in his pasture, near Winters. It was returned to him recently by a Fort Worth packing firm, which reported that the charm had been found in the stomach of a slaughtered steer recently sold to the packing firm by Huntsman.

Great Sons of Texas



STERLING ROBERTSON

Sterling Robertson, born in Nashville, Tenn., in 1785, was one of the great sons of Texas. In 1825 he took over a contract with the Mexican government to bring 800 families to Texas.

Later, Mexico passed a law to expel all foreigners from Texas who had not been introduced into the country in accordance with the colonization laws of March, 1825. This resulted in the expulsion of Robertson's first colonists, and necessitated several laborious trips on his part to the City of Mexico to secure the rights guaranteed him under his colonization contract.

In 1834 he founded the town of Sarahville de Viesca, on the heights overlooking the falls of the Brazos river, near Marlin. This was a boom town during the days of the Republic.

In the spring of 1836 he organized and commanded a company of volunteers that helped to win the Battle of San Jacinto. A member of the senate of the Republic of Texas, he was active in passing laws for the benefit of the colonists.

Sterling Robertson signed the declaration of independence that was drawn up by a convention of Texas delegates at Washington-on-the-Brazos March 2, 1836.

Colonel Robertson died at his home in Robertson county, Texas, on the 4th of March, 1842.

MAKES LIVING CATCHING SNAKES

Theodora Tausch, of Los Angeles, Cal., has an odd vocation—he catches snakes for a livelihood. With headquarters at Eagle Pass, Texas, he recently made forays out among rocky hills and chapparal jungles in search of the reptiles. Tausch sells the snakes to zoos, biological institutes and "connoisseurs," who claim that snake meat is a table delicacy.

PER PUPIL COST OF TEXAS SCHOOLS

A survey of the nation's largest cities by the Bureau of Education at Washington showed that five Texas metropolitan areas spent much less per pupil than like cities in other States.

The figures for 1930, 1932, 1933, 1934 and 1935 for these Texas cities showed: El Paso, $4.14, $4.50, $3.38, $2.10 and $2.37; Houston, $6.24, $4.41, $4.02, $3.83 and $3.83; Dallas, $6.09, $4.98, $4.89, $4.52 and $4.77; San Antonio, $5.79, $4.55, $4.01, $3.55 and $4.61; Fort Worth, $4.42, $3.88, $3.80, $3.96 and $3.34.

The 1935 figures for other large cities were: New York, $9.74; Chicago, $12.67; Philadelphia, $8.26; Detroit, $11.59; Los Angeles, $10.65; Cleveland, $11.29; Cincinnati, $11.74; Indianapolis, $8.91; Minneapolis, $11.70; Des Moines, $11.03; New Orleans, $4.22; Atlanta, $3.78; Denver, $6.83; San Francisco, $9.50; Spokane, $8.70.

SO CAN WEST TEXAS GROW BIG ONES

Atlanta (East Texas) has been bragging about its big melons, grown by E. O. Kennedy—one of them weighing 183 pounds. S. L. Phillips, farmer, near Weatherford (West Texas), grew two melons that weighed 113 and 114 pounds, respectively.

1935 INCOME OF CITRUS GROWERS

Citrus growers of the Rio Grande Valley and South Texas received gross payments of $4,135,000 for their 1935 grapefruit and orange crops, an increase of $657,000 over the 1934 figure of $3,478,000 according to estimates released by the crop reporting board of the U. S. Department of Agriculture at Austin.

BONES OF IMPERIAL ELEPHANT EXCAVATED

Bones of a huge imperial elephant which scientists say roamed Texas about one million years ago has been excavated from the bank of a creek near Fredericksburg.

The bones had disintegrated to such an extent that only two tusks and part of the vertebra remained intact. Each tusk was about 7½ feet long.

GROWS PECANS ON HICKORY TREE

The Halletsville Tribune published this news item: "Mr. J. F. McCord has a hickory tree on his farm that bears fine Burkett pecans, says our County Agent, G. C. King. Two years ago buds of a good Burkett variety of pecans were grafted into the hickory tree and the scions already bear a good number of pecans."

BOY ACCIDENTALLY SHOT BY DOG

Marvin Maddox, age 16, was shot to death by a dog in a peculiar manner near Nacogdoches. Maddox and a companion, while hunting, had chased a squirrel into a hollow tree. Maddox rested his gun on a log and started to climb the tree. His dog, barking and excited, ran against the gun with such force that it was discharged prematurely, the load striking the boy in the head.

RODE BICYCLE FROM CANADA TO TEXAS

Gerald Ward, age 23, rode a bicycle from Vancouver, Canada, to Fort Worth to matriculate for the new term of the Southwestern Baptist Seminary. He is a graduate of British Columbia University.

He explained that he cooked his own meals and slept on the roadside to cut down expenses during his travels through seven States. Two blankets carried on a handlebar pack made up his bedding.

FIRST DISCOVERY OF PECANS IN TEXAS

The first authentic discovery of pecan trees in Texas is recorded by Cabeza de Vaca, the first white man, according to historians, to set foot on Texas soil. Shipwrecked and cast up on the Island of Galveston, in 1528, Cabeza de Vaca, a Spaniard, wrote a letter to the King of Spain wherein he said he had "found the nut on all rivers, the meat was delicious and the shells so thin they could be cracked with the teeth."

ELECTRICAL FENCES

Some Hidalgo county farmers have built electric fences, says County Agent R. G. Burwell. Only one wire is used which is charged from a purchased battery, the same as the battery of an automobile, with a step-up transformer to adjust voltage. The shock scares an animal and keeps it within confines of the pasture.

Farmers are advised not to use power from a regular electric service line because sometimes 110 volts is sufficient to kill livestock or human beings.

EARLIER ATTEMPTS TO SETTLE TEXAS

Prof. Carlos Casteneda, of the University of Texas, says recently discovered manuscripts establish that a second attempt at colonization in what is the United States, occured near the mouth of the Rio Grande in 1519.

Four attempts to set up colonies in Texas on the north side of the Rio Grande were made between 1519 and 1528, and the Carankawas Indians, a fierce tribe which inhabited the coast country, destroyed one of the colonies, he says.

TEXAS HISTORY WOVEN INTO RUG

Woven by three famous Chinese rugmakers in Tientsing, China, the "Rug of Texas," a superb example of Oriental art and workmanship, is now being displayed at 3907 Ross Avenue, Dallas. It required eight months to complete the weaving.

The theme of the rug is the 400 years of Texas history, beginning with the French explorers in 1519, and continuing on down through the periods of the six flags of Texas. Within the boundary lines of the map are woven figures of Indians, rangers, governors, animals, cities, rivers, early stage coach routes, etc.

40-INCH SNAKE IN SAFE DRAWER

The Harlingen Star says: B. C. Price, employe of the Huitt Motor Company here, had the shock of his life when he opened a safe drawer in the company's office and discovered a 40-inch blacksnake. It is unknown how the snake got into the drawer.

VETERAN OF 3 WARS DIES

Col. Frank H. Adams, age 64, veteran of three wars, died at San Antonio, October 17. He served in the Spanish-American War, Philippine Insurrection and in the 38th infantry division in the World War.

Col. Adams was awarded the Distinguished Service Cross and Silver Star Citation.

FOUR NEW NATIONAL FORESTS IN TEXAS

Presidential approval of four new national forests in Texas has been announced by the forest service.

The new tracts, all in East Texas, include more than 1,000,000 acres and will be known as the Angelina, the Sabine, Davy Crockett and Sam Houston forests.

TEXAS BANKS SHOW GAIN

F. T. O'Connor, comptroller of the currency, in addressing the Dallas Clearing House Association, at a luncheon, made the following statement about Texas banks:

"Texas' national banks number 456, an increase of 1.33 per cent in the last three years. Loans and investments of $693,992,000 represent a 29.35 per cent increase."

FARMER GETS PERMIT TO KILL DUCKS

Before the duck and geese season opened, J. D. Pawlik, farmer living 22 miles south of Pampa, received permission from the Texas Game, Fish and Oyster Commission to kill ducks and geese that had been raiding his 200-acre maize, kaffir and hegari fields.

Pawlik wrote the commission: "If I am not permitted to kill these ducks and geese my entire crop will be ruined."

USES CATTLE BRAND 100 YEARS OLD

W. H. Roberts, Llano stockman, trail driver and ex-Texas ranger, uses a cattle brand which has been in his family approximately 100 years and ranks among the oldest Texas brands in use.

Roberts says the old mark and brand are placed on his cattle with the treasured branding iron his uncle, the late George Baker of San Saba, had made many years ago. The brand is a neat B on the left hip, and the mark is a swallow fork left and a grubbed right ear.

Roberts' maternal grandfather, James H. Baker, a native of Virginia, came to Texas in 1830. He was granted a headright on the San Saba river on account of his 17 months' service in the army of the Texas Republic.

"TRICKHAM" AND "CHEATEM"

Trickham is the name of a town in West Texas. The Vernon Record printed this story recently:

"A large circular sign before one of Trickham's two blacksmith shops reads:

"'JUSTICE OF PEACE,
NOTARY PUBLIC,
and MATRIMONIAL SERVICE,
BLACKSMITHING and
OX-WELDING,
BINGHAM and HAYNS.'

"T. D. Bingham, Justice of the Peace, lives on a farm up the Santa Anna road, but he may be found when his legal services are required.

"Dick Cheatem, who once operated a store in Trickham, has often told the tale of a stranger who halted at his store to inquire, 'What is the name of this place?'

"'Trickham,' came the answer.

"'And what is your name?'

"'Cheatem.'

"'Giddap!' said the stranger. 'I won't stop in such a place'."

FIVE-LEGGED FROG

The editor of the Whitesboro News-Record, in a recent issue of his paper, discourses as follows about local freaks:

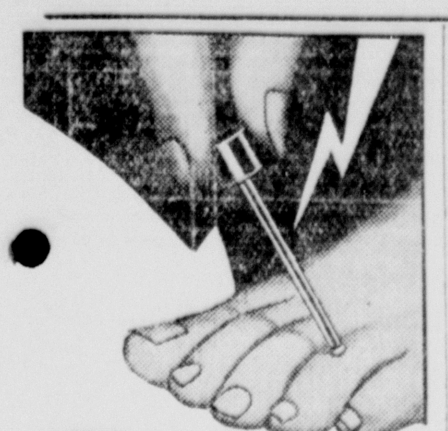
"Nearly every week some of our readers bring proof to us of something odd that happened in their neighborhood.

"This week it is a five-legged bullfrog. Several weeks ago we had a six-legged calf, then a three-eared rabbit and now this five-legged croaker.

"Bill Mitcheson, of Sandusky, caught the multiple-legged frog nearly three months ago and has kept him alive since that time in a spring near his home. The freak frog was caught in the Jordan creek, south of Whitesboro.

"The additional leg on the frog is in the front, giving him three front legs and two hind ones. If the additional leg was attached to the rear he would be of great value as a food product.

"Bill is ready to put the frog on the market for sale, so if there are any frog fanciers or freak collectors in Whitesboro, or elsewhere, this will be a good opportunity for them to add to their collection. Bill's frog is guaranteed to be alive and kicking with all five feet."



Corns

Lift Right Out!

Just drop FREEZONE on any tender, touchy corn. Quickly it stops aching; then in a few days you just lift that old bothersome corn right off with your fingers. It works like a charm. Seems like magic!

A bottle of FREEZONE costs a few cents at any drug store and is sufficient to remove most hard corns, soft corns and calluses. Try it!

FREEZONE

DEEP SEA CABLE REPAIRS

The captain of a cable ship recently reported that he had repaired a break in a submarine cable off the coast of South Africa with little or no difficulty. However, even if all goes well, the job of locating and repairing an ocean cable seems intricate and arduous to a land-lubber.

Electricians on shore first determine by means of special instruments where the cable is broken. Then the cable ship steams to the spot. Usually it arrives after sunset and takes exact bearings from the evening stars. A buoy is then put overboard as a marker. Next morning the cable ship lowers a grappling hook and steams slowly back and forth at right angles to the path of the cable.

When the cable, which is often buried in the mud, is hooked, it is immediately pulled to the surface and repaired.

The ships can work only in calm weather because an up-and-down motion of the ship would sever the cable. Once a ship had to sail back and forth for six weeks before the weather moderated. On another occasion, however, a ship located a cable, pulled it to the surface at the exact point where repairs were needed, and made the repairs in four hours.

SNOW-PLOWING TIME

Approaching winter in the Rocky Mountains finds great activity in the locomotive roundhouses. There the great snowplows and special engines which keep the railroad tracks open are being groomed for their annual battle with the snowdrifts.

Without these gigantic snowplows, hundreds of miles of track would be closed every winter. When the land is open and level, so that deep snow drifts do not form, a "wing" or "triangular" plow is used. This is a heavy kind of plowshare, huge in size, which is attached to the front of a special engine. The plow pushes the snow off the track as a plow turns a furrow in the earth.

In the Rockies, however, where deep drifts form in cuts, rotary snowplows are used. The rotary plow, consisting of a wheel nine feet across set with plowshare-like blades, is driven by a special engine.

The snow, instead of merely being driven to one side, is blown high into the air so the wind can carry it away. It is seldom that a drift cannot be pierced by a rotary plow, but sometimes two or more engines have to push it.

A LITTLE FUN *Jokes to Make You Laugh*

Too Close

"Has your wife any distant relatives?"

"No." They've all come to live with us."

Song Stimulant

Mrs. Youngbride—"Now I know why it was that Dick went to work this morning singing as I never heard him sing before."

Neighbor—"What was it?"

Mrs. Youngbride—"I made a mistake and gave him birdseed for breakfast food."

This is the End

A Dutch farmer who had had a pig stolen from him ascended the witness stand to identify the stolen property.

"Did that hog of yours have any ear-marks?" asked the attorney for the defense.

The Dutchman thought a while and then replied:

"Vell, de only ear-marks dat I remember vas his tail vas cut off."

A Misfit

The large lady was trying desperately to get a seat in the trolley car, but the narrow space between the seats seemed too much for her.

"Why not try sideways, lady?" the conductor suggested helpfully.

"'Cause I ain't got no sideways!" she replied.

Sweet Young Graduate

"M'randy," her mother addressed the daughter, who had just returned from graduating at Fisk University, "you want some 'lasses on yo' hoe-cakes?"

"Mothaw, you should say 'mo-lasses,' not 'lasses."

"Gal, don't talk foolishment to me. How kin you have mo' 'lasses, when you ain't had no 'lasses yit?"

False Alarm

An old German farmer entered a drug store one morning and addressed the proprietor:

"Mr. Becker, I haf der schmall pox—"

"Merciful heavens, Mr. Hoffmyer!" exclaimed Becker, as the store force scrambled over each other in their hurry to get out, "don't come any nearer."

"Vot's der madder mit you fellers, anyhow?" quietly replied Hoffmyer. "I say I haf der schmall pox of butter out in mine vagon, vot Mrs. Becker ordered last veek alreaty."

Neck o' the Woods

Uncle Hiram, who had just moved from one small village to another one still smaller, complained bitterly of the lack of excitement in his new home.

"You folks," he said "don't do nothin' but set around. 'Specially in the winter. The gals set around and hug the stove and the fellers smoke."

"How is it in Springdale, Uncle Hi?" asked one of the listeners.

"In Springdale it was different," replied the old man. "In Springdale the men set around and hug the gals and they let the stove smoke."

Politics in Maine

The Republican Gubernatorial candidate was making a campaign speech up in Maine, and in the course of his address, he asked if there was a Democrat in the audience.

A long whiskered old man rose in the back of the hall, and said: "I am a Democrat."

"Can you tell me just why you are a Democrat, my friend?" asked the candidate.

"Certainly. I've always been a Democrat, my father was a Democrat, and my grandfather was a Democrat."

"Then if your father had been a horsethief and your grandfather had been a horsethief, you would be a horsethief?"

"No," he said, "I'd be a Republican."

Unbalanced Budget

"I hope you are not afraid of microbes," apologized the paying-teller as he cashed the school-teacher's check with old currency.

"Don't worry," said the young lady, "a microbe couldn't live on my salary."

And Was Still Hungry

"Did yer ever see a worse crop failure than this one?" asked the old timer, referring to the recent drouth.

"Yep, I've seed a few of 'em in my day," replied the other old timer. "Now, in 1884 the corn crop was purt' nigh nothing. We cooked some for dinner one day, and paw ate fourteen acres of corn at one meal!"

According to Webster

Daniel Webster was the guest at dinner of a hostess who insisted rather annoyingly that he was eating nothing at all, that he should eat more of the good things spread before him. Finally, Webster smiled and addressed the kind lady in a courteous, senatorial manner:

"Madam, permit me to assure you that I sometimes eat more than at other times, but never less."

High Labor Costs

When the grocer in the big city informed her that the price of eggs was sixty cents a dozen she exclaimed: "Why, that's five cents for each egg."

"Yes, mum," said the man, "but you must remember that one egg is a whole day's work for a hen."

A Little Closer

The country youth, son of a Scotchman, had driven in to the county fair with his sweetheart. They passed a booth where fresh popcorn was for sale.

"My! Abner, ain't that nice?" exclaimed the girl.

"Ain't what nice?" asked Abner.

"Why, the popcorn; it smells so awfully good," replied the girl.

"It does smell kind o' fine," drawled the youth. "I'll jest drive a little closer so you can get a better smell."

He Knew the Answer

The speaker was warming up to his subject:

"As Daniel Webster says in his great dictionary——"

"Hey!" came a voice from the audience. "It was Noah who wrote the dictionary."

"You are mistaken, my friend," said the speaker, unabashed; "Noah built the ark."

Samson's Weapon

A Sunday school teacher asked her scholars with what weapon Samson had killed so many Philistines. All of the youngsters hesitated, when the teacher, to clear up the matter, pointed to her jaw, and said, "What is this?"

A light broke on the face of one of the children. "Oh, I know, Miss Brown! It's the jawbone of an ass!"

Net Profit

Two Cape Cod fishermen had an argument one day as to which was the better mathematician. Finally the captain of the fishing smack proposed the following problem for them as a test:

If a fishing crew caught 500 pounds of cod and brought their catch to port and sold it for six cents a pound, how much would they receive for the fish?

The two old fellows got to work, but neither seemed able to master the intricacies of the deal in fish, and they were unable to arrive at an answer.

At last old Bill turned to the captain and asked him to repeat the problem. The captain started off: "If a fishing crew caught 500 pounds of cod and——"

"Wait a minute, there, wait a minute," said Bill. "Is it codfish they caught?"

"Yep," answered the captain.

"Durn it all," said Bill. "It ain't no wonder I got no answer. Here I been figurin' on salmon all the time."

POULTRY NEWS

Egg and Poultry Prices

While poultry raisers may be impatient over the fact that egg prices this fall have remained persistently low in spite of the much higher production cost, it is possible that a stronger winter market may be the result.

Because of the lower prices and the fact that egg handlers have been unwilling to accumulate any large stocks of eggs, even at these lower prices, the consumption of eggs has held up remarkably well. For the two weeks ending October 3, the trade output of eggs in the four principal markets was about 12.5 per cent higher than for the same period in 1935.

This large consumption of eggs has meant a decrease in storage holdings larger than usual, and on October 1, there were only 5,817,000 cases in storage, compared with 6,353,000 a year ago, and a five-year average of 6,695,000 cases.

Leading Markets Receive Fewer Eggs

During the early fall about 5 per cent fewer eggs were received at the four principal markets than in the same period last year. This fact, coupled with the higher rate of consumption and the low storage holdings, should result, it seems, in better prices than last year. Undoubtedly it will be attained if the leading markets continue to receive fewer eggs than a year ago. In spite of the heavy sales of poultry during the past summer, egg buyers still are inclined to fear, however, that laying flocks are larger than a year ago, and that more eggs will be produced this winter. In many sections of the country pullets were hatched late last spring, and it is impossible to predict just yet what effect these late pullets will have on the winter egg supply.

Poultry

Prices of poultry are likely to remain relatively low throughout the fall and winter, due to the extremely large storage holdings of dressed poultry. On October 1, there were 82,076,000 pounds in storage, compared with 39,720,000 pounds a year ago, and a five-year average of 46,573,000 pounds.

Principal interest in the poultry market will center around turkeys during the next couple of months. A survey conducted by Turkey World indicates that there are around 13 or 14 per cent more turkeys in the United States this year than a year ago. Prices in October were almost identical with those of last fall, and it seems logical that prices should continue at least as high as they were a year ago. One factor which may tend to upset the market is that a good many turkeys may come to market early in an unfinished condition, due to feed shortage. The storage holdings of turkeys is not burdensome, and, with the more prosperous condition of city consumers, it is likely that turkey prices would be higher this year than a year ago, were it not for the heavy supplies of poultry and of beef.

He's handy with his "makin's" —rolls 'em in 8 seconds!

LOUIS STEUBER, being an architect, is used to figuring out the best way of doing things right. Here's Lou rolling a Prince Albert "makin's" cigarette. And he does it in 8 seconds. (Check up and see how fast *you* roll a cigarette.) "Since I switched to P. A.," says Lou, "I've been spinning out a quick, neat smoke every time. P. A. smokes better too. Easy on the tongue, yet so full and rich. Boy—what a flavor. I turn out around 70 cigarettes from one tin of P. A. That's a saving for the old pocketbook!" Prince Albert is swell for pipe smoking too.

© 1936, R. J. Reynolds Tob. Co.

Now's the time to take up the P. A. no-risk offer

Roll yourself 30 swell cigarettes from Prince Albert. If you don't find them the finest, tastiest roll-your-own cigarettes you ever smoked, return the pocket tin with the rest of the tobacco in it to us at any time within a month from this date, and we will refund full purchase price, plus postage. (*Signed*) R. J. Reynolds Tobacco Co. Winston-Salem, N. C.

PRINCE ALBERT THE NATIONAL JOY SMOKE

70

fine roll-your-own cigarettes in every 2-oz. tin of Prince Albert

SOAP

This is the story of soap. Soap is a mixture of fat and lye. The fat may be from hogs, cattle, fish, sheep, petroleum, palm and cocoanut trees, rape, linseed, hempseed, or other vegetables. Hard soaps are made with soda lye, soft soaps with potash lye.

The dirt washed from clothing is a mixture of oil and dust. Oil from the skin catches dust, making a greasy dirt which must be dissolved before it can be washed out.

For this reason soap must contain the proper proportions of fat and lye. If there is too much fat in the soap, it simply adds to the amount of oil already in the clothes, and does not break it up into particles so it can be washed out. It is the lye in soap which separates the grease.

On the other hand, if there is too much lye, it eats into delicate fabrics, leaving a network of tiny holes in the cloth.

Toilet soaps have more fat than laundry soaps. Too much lye would remove all the oil from the skin, making it so dry it would chap.

Soap making was, and still is in many parts of the world, a domestic art. Each household made its own soap. Scraps and leavings of all kinds of fat were carefully saved to be boiled down. The lye used was obtained by soaking or leaching the ashes of wood fires. When the melted fat was treated with this lye, it turned to soap. This process yielded a soft soap, yellow in texture, and harsh in action. To make a hard soap from it, the housewife treated it with brine.

Commercial soap making is really the same process, only on a larger scale. Kettles are used which sometimes hold 1,000,000 pounds.

Hard yellow soap is made of tallow and various oils boiled with soda lye. Afterwards brine is added. The soap, which is lighter than water, comes to the top and floats so that the fluid can be drawn off.

Then rosin is added, and more lye, and the mixture reheated. This is done again and again until the soap is finished.

When the boiling is over, the soap is run into machines where it is stirred and beaten, and then into great molds, where it hardens. Then it is cut into bars or long strips by steel piano wires and finally dried to give it the proper hardness and to prevent it from dissolving too rapidly when used.

Castile soap (named after Castile, a Spanish province whence it came originally), and other fine toilet soaps are made with olive oils and soda lye. They are usually scented and stamped in a press with the maker's brand.

Many kinds of toilet soaps are colored to add to their attractiveness, but the purest soaps are white. Transparent soaps are made by dissolving dried soap in alcohol, and then letting the alcohol evaporate. Shaving cream is made by beating up (not boiling) fine lard with potash lye at room temperature. Marine soap, which lathers readily in salt water and is therefore used on ship board, is made from cocoanut oil and lye. "Naphtha" soaps usually contain a little ordinary kerosene, which helps to dissolve the oil in soiled clothing.

Powdered soaps or soap powders are ordinary laundry soaps dried and ground. Scouring soaps contain sand or granite dust, and scouring powders are mixtures of ground soap and sand or pumice.

The finest imported toilet soaps come from France and England. They have in them many costly perfumes and other ingredients. They have a delicate scent, make soft lather, and are very expensive. The more faint the perfume the more expensive the soap.

Soap also is manufactured by many plants. In South America there is a tree, whose fruit makes such an excellent lather that it is used to wash clothes. The bulbs of a California plant are likewise used as soap. When these are rubbed on clothes a thick lather arises which smell almost exactly like that of new soap.

FARMER'S FRIEND

The common earthworm still holds the title as the farmer's most efficient "hired hand." It plows and enriches the soil and also drags leaves into its burrow, where they remain to make excellent fertilizer. The importance of their work can be judged by the fact that they annually bring to the surface seven tons of new soil on each average acre of land, say the scientists. If it were not for their activities, it is claimed the soil would soon become as hard as rock.

PLAGUE OF PYTHONS

Singapore, in the Malays, is frightened by a plague of pythons. The great reptiles have invaded the town and even appeared in the new supreme court building.

The snakes glide around and under houses, seize chickens, dogs, cats, ducks and pigs.

One 12-foot python almost caught a native workman in its deadly coils, but was finally lassoed and forced into a barrel.

Pythons have no poison apparatus but suffocate their prey by constriction, literally squeezing out the breath with their powerful coils. A large python can easily swallow a child but is seldom dangerous to man.

Some firms even keep pythons in their warehouses as rat catchers. They are placed there when young and killed when they become too large.

God is a Spirit: and they that worship him must worship him in spirit and in truth. John 4:24.

TEXAS FARM NEWS

Rabbits have been damaging the soybean crop in the Kaufman area.

The Russian government, through representatives, has been buying Texas Angora goats and rams.

The Cochina ranch, lying in Dimmit and LaSalle counties, about 30,000 acres, was sold at a trustees' sale for $223,936.16.

A report from Grimes county WPA officials shows that women employed in the sewing rooms have made more than 15,000 garments during the past year.

Ranchmen in the San Angelo area raised funds with which to send 4-H boys' calves and lambs to the Texas Centennial Exposition at Dallas.

The Luling Foundation Farm, at Luling, has been exhibiting films of how it utilizes home-grown feeds in raising pure-bred turkeys, sheep, dairy and beef cattle.

Walter C. Porter, age 68, known as the father of demonstration farming in Texas, died October 21 at his home north of Terrell. For 40 years he had conducted his model farm, near Terrell.

B. M. Goldsmith, Quitman (Wood county) buyer, estimated that 400,000 pounds of peas have been shipped from the county this season, returning to the growers approximately $15,000.

Dallam county's farm boys will be taught in school how to care for the soil and prevent wind erosion. Joe M. Hatton, assistant county agricultural agent, will conduct special courses in all the county's rural schools.

Prospects in the Winter Garden section, south of San Antonio, are reported to be excellent. Early eggplant, pepper and tomato crops are doing well, and most of the early spinach acreage plantings have a fairly good start.

J. Palmer Schochler, who resides about four miles west of Jacksonville, grew and marketed over 200 tons of watermelons this year. Mr. Schochler planted 75 acres in watermelons, and the yield was good. He sold to truckers and to "regular town customers" and found a ready market for all the melons he produced, says the Jacksonville Progress.

Oak Cliff Alberta, white leghorn hen, put the Enterprise Hatchery of Hubbard, Texas, in the lead at the end of the third month of the half-year egg laying marathon contest at the Texas Centennial Exposition. Oak Cliff Alberta produced 73 eggs during the three months, including 25 in August or one less than her July production when she scored highest, 28.60.

Lampasas county farmers, 400 of them, met at the courthouse in Lampasas to urge a program of terracing throughout the county.

A sow belonging to A. P. Stobaugh, near Stockdale, fell into a 35-foot abandoned well, says the Stockdale Progress, and before she was rescued gave birth to seven pigs. At last account, sow and pigs were doing well.

The Bureau of Agriculture Economics, department of agriculture, forecast the 1936-37 Texas citrus crop as the largest on record. Texas grapefruit production, based on October 1 conditions, was estimated at 6,730,000 boxes, an increase of 3,898,000 over 1935, and orange production at 1,436,000 boxes, an increase of 688,000.

The Waco News-Tribune says J. W. Walker terraced his farm in 1925. Washing has been stopped, the ditches have leveled up, and this year his cotton produced a third of a bale to the acre as against a bale to five acres on similar land not protected by terraces. He threshed 35 bushels of oats per acre as compared to about 12 bushels on unterraced land of similar type.

Central Texas newspapers tell this story about a Falls county 4-H club boy: "A yield of 44 bushels of corn per acre from a one-acre demonstration has been reported to W. I. Ross, Falls county agricultural agent, by Howard Haug, 4-H club boy. Howard sold the corn for 80 cents per bushel, making a total of $35.20 return on the acre. Howard used yellow dent seed corn selected from the barn from corn grown on the farm in 1935. After careful selecting and shelling the seed was treated to insure a better stand. The corn was grown on black land that had been terraced and given good deep plowing in the fall, followed by clean level cultivation after the corn was up."

Some citrus growers in the Rio Grande Valley are giving attention to lime-growing, a new crop that is prolific and sells well.

Ross Bros., of Fort Worth, largest mule buyers in the Southwest, report a shortage of these animals.

Rio Grande Valley canners are canning dried cooked peas. It is the first time dried cooked peas have been canned in this section.

Sweet potato growers of Johnson county will construct a sweet potato curing plant with capacity for storing 20,000 bushels a year.

Texas still leads the world in production of cottonseed oil, producing 30 to 40 per cent of the United States supply.

Veterinarians are warning farmers against pasturing horses on sudan grass while it is wet and has a mold between stalk and blade.

The Texas Cotton Association warns farmers not to bring their cotton to the gin wet. Ginning wet cotton damages the lint and makes it unmarketable.

Learning to tan leather is one of the objectives of the Lock Hill Boys 4-H Club, near San Antonio, according to Fred W. Mally, county agricultural agent.

The Southwest Karakul Association has been organized in Texas to sponsor production of more wool and fur from Karakul sheep. Expensive black fur coats are made from the skins of male Karakul lambs, killed between 5 and 10 days after they are born, and the skins removed and dressed.

About 85 per cent of the mohair in the United States is said to be produced in the Edwards Plateau area in Southwest Texas.

The San Antonio pecan market, one of the largest in the State, opened at 10 to 11 cents a pound in the shell, compared with 5 cents last year, due to the very short crop.

A rose packing plant is reported to have been established at Jacksonville by an Eastern firm. The firm expects to handle from 100,000 to 250,000 rose bushes this season.

W. D. Sims, pecan specialist of the State Department of Agriculture, is urging Texas farmers to utilize bottom land for planting of pecan trees and for budding and grafting on older native trees.

A sheep with four horns and outside wool that looks like mohair is owned by Al Kinsey, near Fort Stockton. He says it is a breed known as the wild sheep of Mexico that was found there by Spaniards centuries ago.

A turkey grading school was held November 4 and 5 in Fort Worth, sponsored by the Texas Extension Service. Other turkey grading schools will be held in the various sections of Texas throughout the year to familiarize the grower with the production of quality meat birds.

Governor Allred will establish regulated zones in Cameron, Willacy, Hidalgo and Starr counties in an effort to eradicate pink boll worm infestation. J. M. Del Curto, State entomologist, and R. E. McDonald, Federal entomologist, said the infestation was too slight to cause alarm. Regulated zones, they said, would not interfere with trade. Traces of infestation have been found at San Benito, Brownsville and Rio Grande City.

The Soil Conservation Service finds that terraces should not be much over a quarter of a mile in length. Shorter terraces generally conserve moisture and retard washing better than long terraces.

John Reed, farming 4 miles southwest of Eastland, is raising some Rhode Island Red capons to determine whether there is sufficient profit in capon raising to justify going into it on a large scale.

"To reduce the number of boll weevils in the cotton fields next year every farmer should plow up all cotton growth as soon as cotton picking is complete," says R. R. Reppert, extension entomologist of A. & M. College.

W. N. Meares, supervising tobacco examiner from Tampa, Fla., who visited San Antonio recently, said, "Texas has a promising future as a tobacco-raising State and the possibilities are unlimited."

G. R. Gynn, farmer in Randall county, contoured half of an 80-acre field. On the 40 acres contoured the average yield per acre was 17 bushels while that not contoured had a yield of only six bushels, says B. A. Zorns, assistant county agricultural agent.

Mrs. A. F. Avery, home food supply demonstrator in the Clements club in precinct 4 of Gregg county, canned 152 quarts of vegetables, 167 quarts of fruits, 47 quarts of pickles, 49 pints of jam and preserves, and 60 glasses of jelly.

One hundred and forty-two bushels of sweet potatoes from one acre of sandy upland with a profit of $135.90 is the record of Darwin Jordan, 4-H club boy of Ben Wheeler club. Darwin planted his potatoes with eight sacks of 4-10-7 fertilizer. His expense amounted to $27.40. He sold his potatoes at $1.15 per bushel.

Despite heavy rains during the hatching season, DeWitt county will produce slightly better than an average turkey crop, which means that Cuero again will strut her stuff at the annual turkey trot.

Amaplasmosis, a cattle disease new to Gulf Coast counties in South Texas, is being studied by farmers and ranchmen of Aransas, Refugio, and San Patricio counties, with R. R. Gibb, county agent, giving instructions in treatment. The disease is reported as similar to anemia in humans.

The biggest turkey crop on record, about 20,000,000 birds, was forecast for this Thanksgiving in a report by the U. S. Bureau of Agricultural Economics. This is about a third larger than last year's total production of 15,000,000 and compares with the previous record of nearly 19,000,000 in 1932 and 1933.

"I have a sure method of growing tomatoes," stated Mrs. Howard Payne, one of the new members of the Red Oak Home Demonstration club, of Kaufman county. Mrs. Payne has grown high quality tomatoes by following this plan, says the Kaufman Herald: First, flat break ground and bed land into three-foot rows. Set every other row in water furrow, placing plants six feet apart. After plants begin to grow, place shoveful of barnyard fertilizer around each plant before plowing. Work land carefully between rows to keep down weeds and retain moisture. This will make the plants six feet in the row each way.

Numerous farmers in Montgomery county who have tried a few soybeans this year in an experimental way along with the soil conservation program and as a means of trying them out as a forage crop, report good results.

An estimate of the Bureau of Agricultural Economics, department of agriculture, forecast the 1936-37 Texas citrus crop as the largest on record. Texas grapefruit production, based on October 1 conditions, was estimated at 6,730,000 boxes, an increase of 3,898,000 over 1935, and orange production at 1,436,000 boxes, an increase of 688,000.

C. W. Baker, 10-year-old member of the Petronila 4-H Boys' Club, of Nueces county, has picked two and two-thirds bales of cotton from three acres, according to a report he made to County Agent Henry L. Alsmeyer. Young Baker already has received more than $160 for his cotton, which does not include the value of the seed. He is one of the 30 4-H club boys enrolled in cotton demonstration work in Nueces county.

FOOTBALL'S BIGGEST THRILL
BY Ted Husing
FAMOUS SPORTS ANNOUNCER
THE GREATEST THRILL IN FOOTBALL IS A PERFECT SCORING PLAY. MINNESOTA PULLED A BEAUTY LAST YEAR IN THE MINNESOTA-NEBRASKA GAME
MINNESOTA HAD ADVANCED DOWN THE FIELD FOR A FIRST DOWN ON NEBRASKA'S 9-YARD LINE. NOW HERE'S WHERE FOOTBALL BRAINS COME IN. HERE'S WHAT TO WATCH FOR AT THE NEXT GAME—
UNDEFEATED, MINNESOTA FACES TOUGHEST TEST
DOWNS 1 YDS TO GO 9 BALL MINNESOTA
GOAL TO GO!
A LINE PLUNGE OFF CENTER IS STOPPED BY NEBRASKA. THIS PLAY IS NOT INTENDED TO SCORE. MINNESOTA IS DOING WHAT EVERY CLEVER TENNIS STAR, FENCER, OR BASEBALL PITCHER DOES—RUNNING PLAYS TO GET THEIR OPPONENTS OUT OF POSITION & OFF TIMING
DOWNS 2 YDS TO GO 5 BALL MINNESOTA
NEBRASKA STIFFENS!
TWICE AGAIN MINNESOTA THRUSTS AT THE LINE. NEBRASKA STOPS THEM DEAD. THEY'RE FIGHTING WITH EVERY OUNCE OF VIGOR TO PREVENT MINNESOTA FROM SCORING—
DOWNS 3 YDS TO GO 3 BALL MINNESOTA
THE BIG MOMENT—WILL THEY SCORE?
9 TEAMS OUT OF 10 WOULD UNCORK THEIR SCORING PLAYS NOW. BUT NEBRASKA EXPECTS THIS. MINNESOTA HAS TO USE DECEPTION. FOR THE THIRD TIME THEY CRASH THE LINE. THE BALL IS ON THE ½ YARD LINE. MINNESOTA GOES INTO A HUDDLE—
DOWNS 4 YDS TO GO ½ BALL MINNESOTA
GIVE 'EM PLAY Q
—AND COMES OUT WITH THE SWEETEST SCORING PLAY I'VE EVER SEEN. LET ME DRAW YOU A COACH'S DIAGRAM OF IT ON THE TABLECLOTH...
W
X
Y
Z
QB #3
RHB #2
FB
LHB TAIL-BACK
CAMEL
...MINNESOTA IS IN SINGLE WING-BACK FORMATION WITH AN UNBALANCED LINE. THE QUARTER-BACK, #3 BACK, TAKES THE PASS FROM CENTER → Ⓦ DOES A HALF SPINNER → AND TOSSES AN UNDERARM LATERAL TO THE RIGHT HALF-BACK, #2 BACK Ⓧ, WHO FEINTS AT THE LINE, THEN THROWS A SECOND LATERAL TO THE LEFT HALF-BACK, THE TAIL-BACK Ⓨ WHO HAS BEEN COMING OVER. THE TAIL-BACK PIVOTS QUICKLY AND CUTS OFF TACKLE...FOR A TOUCHDOWN Ⓩ
MEANTIME EVERY MAN ON THE NEBRASKA TEAM WHO CAN STOP THE PLAY IS TAKEN OUT. THANKS TO THE THREE PLAYS JUST PRECEDING, THEY ARE OFF-BALANCE AND OUT OF POSITION. THIS MAKES IT EASIER TO STRETCH THEM DOWN FLAT AND OUT OF THE RUNNING. THE ACTION PICTURE SHOWS THE PERFECT MINNESOTA BLOCKING.
TOUCHDOWNS LIKE THAT SEND CHILLS UP AND DOWN MY SPINE. I GET SO WORKED-UP AT A BIG GAME I CAN'T ENJOY MY FOOD AFTERWARDS
LET ME GIVE YOU ANOTHER GOOD POINTER THEN: SMOKE CAMELS BETWEEN COURSES AND AFTER EATING. CAMELS HELP EASE STRAIN FOR ME AND BRING ME A FEELING OF DIGESTIVE WELL-BEING
I COVER A GOOD SECTION OF THE COUNTRY—SEE PRACTICALLY ALL THE TOP-NOTCH ATHLETES—CAMELS ARE THE FAVORITE EVERYWHERE. THEY SET THE ALL-TIME HIGH FOR MILDNESS AND FLAVOR. AND CAMELS DON'T GET ON YOUR NERVES
Yours truly Ted Husing
CAMEL

CAMELS SET YOU RIGHT!

SMOOTH AWAY THE DAY'S UPS AND DOWNS, LET DIGESTION GET OFF TO A GOOD START. JUST ENJOY CAMELS AT MEALTIMES AND AFTER. SMOKING CAMELS SPEEDS UP THE FLOW OF DIGESTIVE FLUIDS—INCREASES ALKALINITY—BRINGS A SENSE OF WELL-BEING—SO **FOR DIGESTION'S SAKE SMOKE CAMELS.** CAMELS ARE MADE FROM FINER, **MORE EXPENSIVE TOBACCOS**—TURKISH AND DOMESTIC—THAN ANY OTHER POPULAR BRAND.

Our Boys and Girls

AUNT MARY, Editor, Route 5, Box 179-B, Fort Worth, Texas.

THANKSGIVING GREETING

DEAR FRIENDS:

What a joyous month this is—how happy we should be. Of course, there are many things in life that are disagreeable and hard; but one of the surest ways to find happiness is to use unpleasant times as a contrast to more happy occasions. When we are sick we fully appreciate good health; when we are discouraged we know how fine it is to succeed. So we go on down the paths of life learning that by contrast we can understand more clearly the good and useful things.

While we need shadows to make us love the sunshine, yet we all can learn to be thankful for the many lovely and beautiful things about us without having sorrow. That is why we pause once each year and, with a feast, thank our Maker for all the good things in life. This feast is known as Thanksgiving. It should be a joyous and happy occasion, yet let us not forget to say truly in our hearts—"Thank you, Father." Of course, the really truly thankful person doesn't wait until a special occasion to say "thank you," but says it often every day. Now let us say 'thank you" to everyone who has been thoughtful of us throughout the year.

What way can we celebrate Thanksgiving in a fitting manner? One boy suggests that we do something kind for someone who cannot return the favor. I think that is a splendid idea. A girl I know suggests that she will feed some homeless animals and also try to find them a home. Another girl tells me she will try to be kind and considerate all day and do everything she can for her mother and help her with the work. A very sweet boy I know said, "I shall eat only half as much as I did last year. I know I will feel better; and then I shall share my dinner with a friend who isn't as fortunate as I." I am sure all of the little friends I have told you about will have a delightful Thanksgiving. What do you intend to do about it?

I have enjoyed the letters from the many friends of this page, for which I give thanks; here's wishing you a joyous and happy Thanksgiving. I hope this coming year will be the most successful so far of all our lives.

With love,
(Signed) AUNT MARY.

Texas.

BIG NEWS
Contest News

At the time this is written already there have come in some splendid ideas for a club. However, I am sorry that more of you did not take advantage of this wonderful opportunity to help form an interesting club and at the same time win a valuable prize.

As we have received many requests to extend the time for sending in plans, we have taken it up with the editors, and the time has been extended to December 1, 1936. There is no reason why every reader of this page can't enter this new and thrilling contest. Just set to thinking and form the kind of plan you would like for a club; then sit down and write us about it. Haven't you often wished you could form a club of your own? Now is your chance to do that very thing—form an interesting club. Use any kind or type of club that you would like to join yourself. Of course, it must be workable through the columns of a newspaper—you understand that we couldn't have meetings and the like—but we can write letters or postal cards. There are so many interesting things we can do. It doesn't have to be on the line of a Shut-In club. However, if a majority wants that kind of club that is the kind we will have. The main thing that I want to know is WHAT kind of club our readers best will enjoy. Shall we make an age limit—or let the grown folks help us? YOU—the readers of this page, must decide. Just write out your plan, following the simple rules and help yourself by helping us.

CONTEST RULES

First—write us a letter of NOT MORE than one hundred and fifty (150) words on the subject: "My Plan for an Interesting Boys' and Girls' Club."

(a). Do not write more than 150 words—more will disqualify your letter.

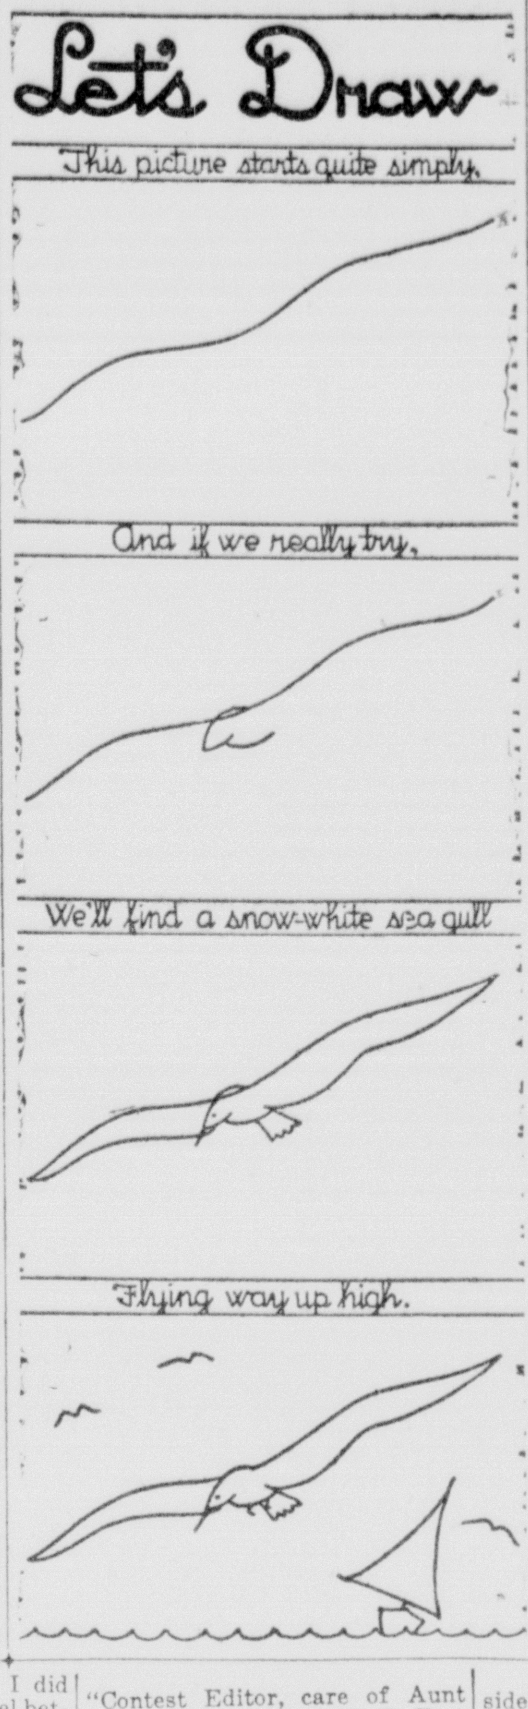
(b). Neatness and correct spelling will be taken into consideration by the judges.

(c). Make a simple outline of your plan—do not go too much into detail.

(d). Write on one side of paper only.

Second—Mail your letter to:

(Continued top of column)



Let's Draw
This picture starts quite simply.
And if we really try.
We'll find a snow-white sea gull
Flying way up high.

"Contest Editor, care of Aunt Mary, Route 5, Box 179-B, Fort Worth, Texas," before December 1, 1936. Letters postmarked later than this date will not be acceptable.

(a). Write your name, address, number of words and age clearly on first page.

It is simple—it is interesting—it is new.

PRIZES

First—For the most interesting club plan submitted we will give:

Your choice of regulation softball, bat and glove (or) two late interesting books suitable for the age of winner.

Second—For the most valuable single suggestion we will give:

Your choice of regulation softball and bat (or) one late interesting book suitable for the age of winner.

Third—For the neatest and best arranged plan we will give:

One interesting book suitable for age of winner.

Your Thanksgiving

As I sit at my desk and think about the Thanksgiving season, I wish I could just "pop-in" on the many readers of this page on Thanksgiving Day—just long enough to say "howdy, folks," and to share a little of your happiness. Yet, no doubt, in some homes there will be sadness—an empty chair and sad hearts. To these homes I dedicate the following Psalm:

Psalm 46

"God is our refuge and strength, a very present help in trouble.

"Therefore will not we fear, though the earth be removed, and though the mountains be carried into the midst of the sea;

"Though the waters thereof roar and be troubled, though the mountains shake with the swelling thereof.

"There is a river, the streams whereof shall make glad the city of God, the holy place of the tabernacles of the Most High.

* * *

"He maketh wars to cease unto the end of the earth; * * *

"Be still and know that I am God. I will be exalted among the heathens; I will be exalted in the earth.

"The Lord of hosts is with us; The God of Jacob is our refuge. Selah."

A Good Thanksgiving Poem

(Dedicated to good folks and happy homes everywhere).

Said Old Gentleman Gay, "On a Thanksgiving Day,
If you want a good time, then give something away."
So he sent a fat turkey to Shoemaker Price,
And the shoemaker said, "What a big bird! How nice!
And, since such a good dinner's before me, I ought
To give Widow Lee the small chicken I bought."
"This fine chicken, oh, see!" said the pleased Widow Lee,

(Continued top of column)

"And the kindness that sent it, how precious to me!
I would like to make some one as happy as I—
I'll give Washwoman Biddy my big pumpkin pie."

"And, oh, sure," Biddy said, "'Tis the queen of all pies!
Just to look at its yellow face gladdens my eyes.
Now it's my turn, I think, and a sweet ginger cake,
For the motherless Finigan children I'll bake."
Said the Finigan children, Rose, Denny and Hugh,
"It smells sweetly of spice and we'll carry a slice,
To poor little lame Jake—who has nothing that's nice."
"Oh, I thank you and thank you!" said little lame Jake;
Oh, what a bootiful, bootiful, bootiful cake!
And, oh, such a big slice! I will save all the crumbs,
And will give them to each little sparrow that comes."
And the sparrows they twittered, as if they would say,
Like Old Gentleman Gay, "On a Thanksgiving Day,
If you want a good time, give something away."

True Stories From the Bible

ELIJAH, THE PROPHET

One of the greatest of all the kings of the Ten Tribes was Jeroboam, the second. Under him the kingdom of Israel grew strong and rich. He conquered nearly all Syria, and made Samaria the greatest city of all those lands.

But though Syria went down, another nation was now rising to power—Assyria, on the eastern side of the river Tigris. Its capital was Nineveh, so vast that it would take a man three days to walk around its walls. Israel was in danger of falling under the power of the Assyrians.

Ahab, a ruler over the Israelites, provoked the anger of the Lord. His wife, Jezebel, worshipped Baal and persuaded her husband to build him an altar.

(Continued top of column)

Elijah, a prophet of the Lord, challenged Ahab to a test. Two altars were built; one to Jehovah and one to Baal. The priests of Baal called upon their god to send down fire, but none came. After Elijah had soaked the wood of his altar with many barrels of water he prayed, and fire came down and burnt up the offering.

The people turned upon the priests of Baal and killed them all.

The wicked queen, Jezebel, coveted a vineyard for Ahab, and she caused the owner of the vineyard, Naboth, to be placed in front of the battle. When he was slain, Ahab took the vineyard. Elijah denounced the king and queen and told them God would send just punishment upon them.

In a little while the prophet's words came true for Ahab was slain in battle and Jezebel was put to death by order of King Jehu.

The life of Elijah was so pleasing to the Lord that He gave him a great honor and happiness at the end of his life—he never died!

Do you know what became of Elijah? Well, God sent a beautiful golden chariot of fire, and horses of fire that parted Elijah and his good friend, Elisah. Then, do you know that the Good Book says? "Elijah went up by a whirlwind into Heaven!"

EARTH'S AGE

At last we are told, with a fair degree of certainty, how old the earth is. A new method of computation shows it has existed 2,520,000,000 years. That is, it has been that long since the earth was pulled out of the flaming bowels of the sun by a passing star. How long it existed as a part of the sun before that time is unknown.

The new method of computation is difficult to explain, but the Hayden Planetarium, New York, says it is merely an extension of the old, very accurate "radioactive clock" method.

Radioactive substances take a certain length of time to change into lead. By using this as a yardstick it was found that oldest rocks are 1,852,000,000 years old. Similarly, by extending the method, it is now calculated that the earth was molten for 700,000,000 years from the time it left the sun until the oldest rocks hardened giving a total age of 2,552,000,000 years.

Lift up your eyes, and look on the fields; for they are white already to harvest. John 4:35.

WAR RINGS

Spanish women are now being asked to donate their gold rings to the cause of war between the royalists and facists. Previously the rings of Italian women had contributed toward the expenses of the Ethiopian campaign.

The wearing of rings dates back to ancient Egypt and before. The Egyptian nobility wore massive rings of pure gold; the poorer classes rings of silver, bronze, glass, pottery, ivory, amber and even hard stone.

Iron rings were worn by the bulk of Roman citizens, but any kind of ring was forbidden to slaves. Only ambassadors could wear gold rings, and then only while performing some public duty.

Signet rings were of great importance in the Middle Ages. Few men could write their name. Instead they made their "mark" with a seal affixed to a ring. They also sent their rings with couriers as a mark of identification.

In the seventeenth century memorial rings with the name and date of death were worn by relatives of the dead man. The usual design was two skeletons holding a coffin.

Poison rings, such as that by which Hannibal killed himself, were widely used in classical times. Some had a concealed hollow point which sprang forth and inflicted a fatal scratch when the wearer shook hands with his victim.

WARNINGS FROM ABOVE

The use of loud speakers on planes is not new. They have been used by the British and others to broadcast propaganda among primitive peoples, but a new use has lately been found.

The Coast Guard plans to install several loud speakers on planes for broadcasting hurricane warnings to fishermen who might not otherwise learn of the sudden approach of storms along the Gulf Coast. The amplifiers are said to be powerful enough to be heard over a radius of a mile when the plane is flying at an altitude of 3,500 feet.

NEW HORSE FLESH

The first shipment of horses from abroad in nearly 25 years has just reached New York from England. The shipment consists of 23 thoroughbreds of the "Suffolk punch" breed. They will be used as draft animals on a farm near Des Moines, Iowa.

Curiously enough, the modern draft horse got its start in the age of chivalry. Knights and cavalrymen needed horses capable of carrying loads of 350 to 425 pounds and large horses were bred.

The advent of gunpowder made armor and heavy horses useless in battle. The cavalrymen turned to fleet Saracen horses, and their former steeds were put to work as draft animals.

During the first 200 years of American history, draft horses were little used. Slow, ponderous oxen took their place. But with the coming of good roads, draft horses were imported and bred in large numbers.

But he that is joined unto the Lord is one spirit. I Cor. 6:17.

SPECIAL GIFT OFFER!
TEXAS CENTENNIAL SOUVENIR SPOON
SEE HOW EASY IT IS FOR YOU TO GET ONE!

A CAN OF MAXWELL HOUSE COFFEE, AND PLEASE LET ME HAVE A SALES SLIP.
MY! THIS IS EASY. AND EVERYONE SAYS THEY'RE SUCH LOVELY SPOONS!
WHY HELEN, WHAT A SIMPLY DIVINE SPOON! I'M CERTAINLY GOING TO GET SOME.

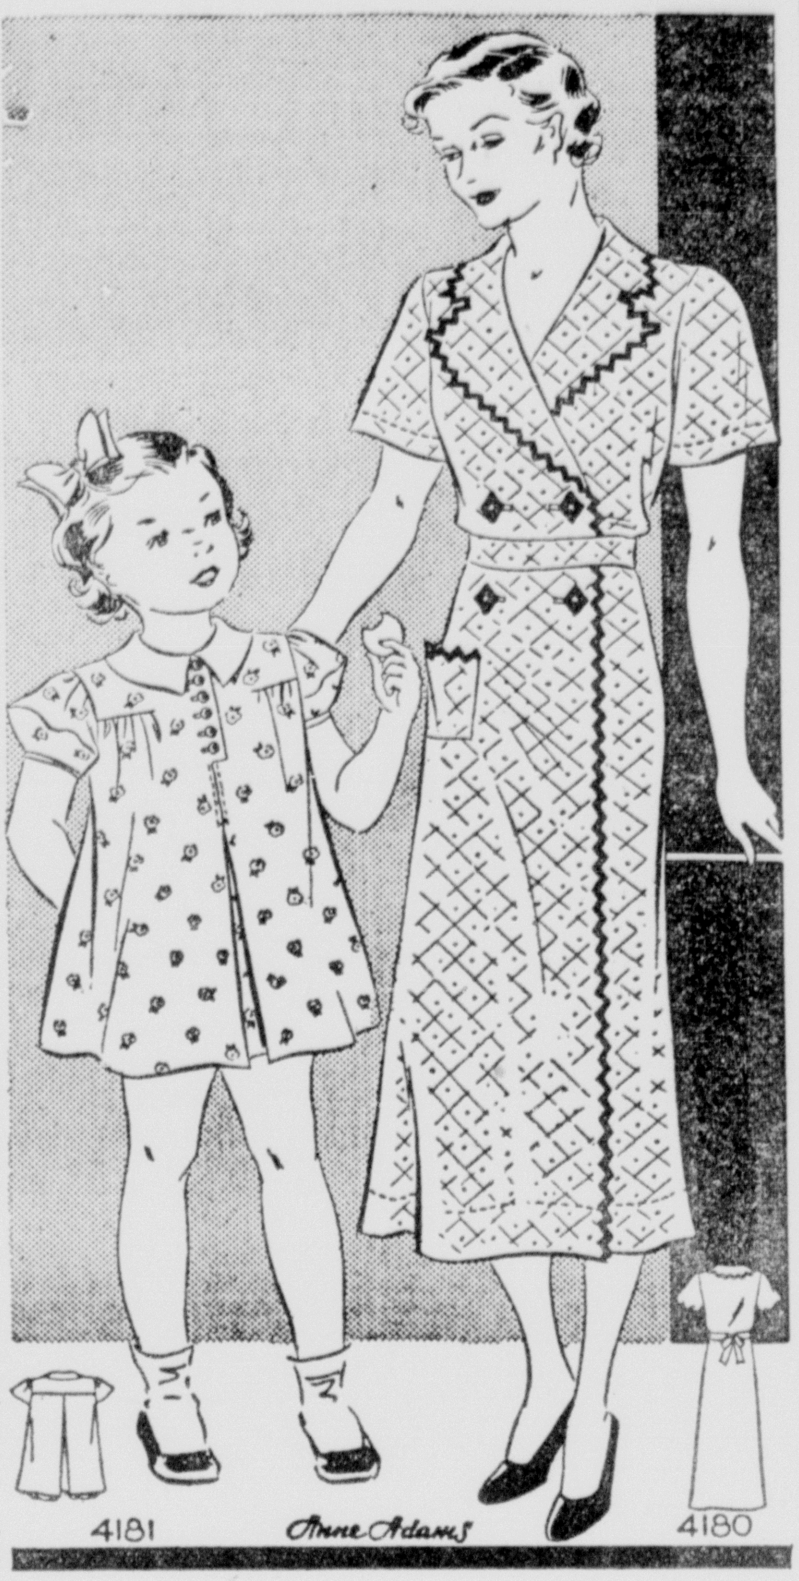
HOUSEHOLD HELPS

MRS. MARGARET STUTE, Editor, Route 5, Box 179-B, Fort Worth, Texas.

MATRON MAKES OWN AND DAUGHTER'S FROCKS FROM SIMPLE PATTERNS

PATTERNS 4181 AND 4180



"I'll run up a frock for daughter, too, while I'm at it," says the matron, who thinks it no more trouble to make two frocks than one, when she uses simplified Anne Adams' patterns. Daughter's frock, Pattern 4181, has simple but smart details that set off her chubbiness to perfection; bloomers, too, come with this pattern. Mother's tickled with the way her coat-frock turned out, all spruced up with ric-rac braid.

Pattern 4181 is available in sizes 2, 4, 6, 8, and 10. Size 6 takes 2½ yards 36-inch fabric and ¼ yard contrasting. Price 15c.

Pattern 4180 is available in sizes 14, 16, 18, 20, 32, 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 5¼ yards 36-inch fabric and 3⅛ yards braid. Price 15c. Illustrated step-by-step sewing instructions included with each pattern.

Send FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for each Anne Adams pattern, THIRTY CENTS (30c) for both. Write plainly name, address and style number.

BE SURE TO STATE SIZE.

Just out! Our new Anne Adams Pattern Book, presenting the smartest in fall fashions, the latest in frocks, fabrics and gift suggestions. You'll find glamorous gowns for after-dusk, alluring daytime models, cheery house-dresses and kiddies' clothes. Styles, too, for the "would be slender" woman, and the girl-away-at-school. Send for it today! Book Fifteen Cents. Pattern Fifteen Cents. Twenty-five Cents for both when ordered together.

Send your order to Southwest Magazine Company, Pattern Department, 243 W. 17th St., New York, N. Y.

YOUR HOME

One day recently I heard a public speaker quote from an unknown author a definition of "home." It was so full of meaning that I pass it on to my readers in hope that it may bring a fuller realization of home values. He said, "Home is where all bitterness is shut out and all love is shut in."

Too often we make our homes the reverse of this by bringing into it bitterness from the outside. The man of the family revives in the home the quarrels with his boss or some associate with whom he has disagreed. The mother saves her disagreements with the butcher, the baker and the candle-stick-maker until husband arrives home from work. And so it is that each member of the household brings home a "kit of trouble" instead of a heart full of love and happiness.

It is understood that no one can be a perpetual "Polyanna." We receive so many knocks, that like the steam engine, we occasionally must let off steam. Then, again, we can use the steam engine example and realize that if we "pop-off" all the time there won't be any steam to carry us forward on life's journey.

In one very happy and successful home I know the motto, "Treat your own loved ones with as much respect as you would a stranger," has been the rule of conduct. This rule rigidly adhered to will change a condition of bedlam into one of peace.

Quite often mother fails to impress upon childish minds the fullness and sweetness of love between brother and sister. In the rush and bustle of life we neglect the seemingly little things that in reality make a full life. Little courtesies to one another are as necessary as the food we eat.

The attitude of the mother is more often reflected in the lives of the children than that of the father; so her responsibility is double. If she shows a partiality for one child, a jealous, unhappy attitude may be developed in the other members of the family and which may vitally affect their whole lives.

Heart hunger is as real as body hunger and should be just as carefully avoided. Yet how often thoughtless, unkind words are used which crush the hearts of those we love the best.

Let us therefore resolve as mothers and fathers to keep bitterness, strife, and contention shut out from our hearts and homes. Let us bring into the lives of our children love, tolerance, and understanding.

Feeding the Sick

Rare indeed is the home that at some time or other has not had within its walls someone who needed a special diet. With this thought in mind I have taken some excellent suggestions offered in "Practical Dietetics" by Alida Frances Pattee and listed them for you.

Many of us have vague ideas of diets for the sick, but not enough definite understanding.

When any member of the family is ill enough to require the attention of a doctor he is in need of special attention to the diet. Many doctors have given a great deal of study to diet and freely advise their patients as to the proper foods. However, many doctors have neglected an intensive study of the subject and give only general directions, relying on those in care of the patient to work out a correct diet. As it often is impossible to secure the services of one scientifically trained to feed the sick, every housekeeper should have some general information on this subject.

For a general picture of the amounts of food required we know: "A tall thin person requires more food than a short fat one of equal weight. A person of nervous temperament, in whom muscular tension is high, may require more food than one of phlegmatic temperament. More energy is lost in the form of heat in cold weather than in warm. A child over six years of age in normal health requires as much energy food as a woman doing light work. A man doing very hard labor requires twice as much food as one at light work." Here we have comparative tables that will help us to select proper diets.

In the treatment of disease there are few subjects which have to be considered more in the daily care of the sick than those which concern the proper nourishment of the patient.

A good nurse (trained or practical) does not exceed or depart from the physician's instructions. However, her ability to observe and understand the reactions of her patient will greatly assist the doctor and add to the comfort and well-being of the patient.

One who cares for a patient has a far better opportunity than the physician to judge the condition of the patient's digestion, and likes and dislikes of various foods. This is why a complete written record is kept of the case for the inspection of the doctor. For this purpose a paper and pencil should be kept at a definite place, out of reach of the patient, and every vital care recorded. It is not wise to let a patient know such a record is being kept. Write down the kinds and quantity of food given, at what time, and briefly, the reaction of the patient. This record consists of how much actually was eaten and the apparent results after the food was taken.

It may happen from lack of care or of definite instructions that the food served will neutralize the effect of medicine, either by over-feeding or by irregularities in feeding, which disturb digestion and interfere with the beneficial effect of the medicine or treatments.

Ill persons often are allowed to drift into a critical condition through not being properly supplied with such nutritive food as their enfeebled systems can digest. Many have perished because those around them did not know how to feed them, either withholding food all together, or giving that which was unsuitable.

Sometimes we serve a food that is disliked by and nauseating to the patient. When the doctor has specifically ordered a certain food, and its results are not satisfactory, the fact should be reported to the doctor at once.

To avoid dangerous mistakes, and to assist in the smooth care of patients, home attendants should insist that the doctor write out all instructions.

Especially for the sick should food be served in as tempting and appetizing a way as possible, and when the food is suitable to the taste and digestive powers of the patient we prevent nausea, vomiting, loss of strength, and even loss of life.

(To be continued: Next month we will give specific details on to how to care for and feed sick persons).

THANKSGIVING MENU

With frost in the air, the savory smells of autumn and the bustle of life all around us, we turn our eyes to Heaven and return "Thanks" for this wonderful life. Indeed, should this be a time of thankfulness and rejoicing. How better could we rejoice than to surround our table with the faces of those we love?

With the thought of smiling faces and happy hearts we have worked out a glorious menu and some unusual recipes.

Grapefruit cocktail
Cream of clam soup
Celery hearts Olives Salted nuts
Roast turkey, bread stuffing, giblet gravy
Glaced sweet potatoes
Creamed onions Cranberry frappe
Head lettuce salad with French dressing
Vanilla ice cream or lemon sherbert
Coffee.

If the above menu doesn't tempt the most

(Continued top of column)

fastidious appetite, then nothing will. Also you will note that the menu is balanced. It was selected for the purpose of giving enjoyment instead of that "stuffed feeling." Try it.

RECIPES—That Are Good

The recipes given on this page are tested for goodness and attractive appearance.

Bread Stuffing

Remove crust from 2 small loaves of bread, break into small bits. Season with 2½ teaspoons salt, ½ teaspoon pepper, and 1 tablespoon finely chopped onion (egg may be added, if desired). Then add 2/3 cup of butter melted in ¾ cup hot water, and 2 slightly beaten eggs. Mix well and fill body of fowl.

Red Currant and Raspberry Tapioca

1¼ cups prepared red currants
1 cup sugar
1¼ cups red raspberries
2 cups water
¼ cup quick-cooking tapioca
½ teaspoon salt.

Steam and wash fresh currants, add ½ cup sugar, cover and heat slowly until sugar is dissolved and currants burst open; add raspberries and cool. Place water in top of double boiler and bring to a boil over direct fire. Combine tapioca, remaining ½ cup sugar and salt; add gradually to water and bring to a brisk boil, stirring constantly. Place immediately over rapidly boiling water and cook 5 minutes, stirring occasionally. Cool—mixture clears and thickens as it cools. When slightly cool, fold in fruit. Chill. Serve in sherbert glasses with plain or whipped cream. Serves 6.

SEA TIGER

September is the month when the great tuna fish migrate southward from Newfoundland and fishermen along the eastern seaboard are out to get them with rod and reel.

A favorite method is to anchor a boat and drop chum (chopped up fish) overboard. The chum sink down to where the tuna lurks. He sees the food and starts feeding on it, gradually working up to the surface, where the fisherman's baited hook is awaiting him.

The tuna, largest of the mackerel family, is described as the "tiger of the sea," "a living meteor which strikes like a whirlwind." A fight with a large one may last 15 hours. One weighing only 125 pounds once towed a boat 20 miles in five hours.

The largest tuna on record, caught off Nova Scotia, measured 10½ feet long and weighed 758 pounds. The fish are found in all warm seas and are greatly in demand for food. In 1929 the catch in California waters alone amounted to over 85,000,000 pounds.

For God sent not his Son into the world to condemn the world; but that the world through him might be saved. John 3:17.

THERE'S A LIPTON BLEND
Whether your taste demands Orange Pekoe, Green Japan, Gunpowder or Young Hyson, say Lipton's to your grocer for complete satisfaction, real economy. There is a difference in tea brands, your first sip of Lipton's will convince you.

ACTION calls for ENERGY!
Children at play, mothers at home, fathers at work—all need vital energy. And as action calls for energy, energy calls for Dextrose. Dextrose is a pure white sugar . . . the "fuel" of the human body. It provides material for energy, banishes fatigue and reinforces vitality.
KARO Syrup is rich in Dextrose. That's why KARO is recommended by doctors for feeding new-born babies, for providing energy for growing children, for active men and women. KARO is not only a fine table syrup but a fine food for the family... When vitality is low or you feel fatigued, remember that KARO can be enjoyed between meals as a spread on bread, waffles, biscuits, or stirred in milk or other beverages... KARO is sold by every good grocer throughout America.

Go After the BIG ONES
When you fish, try for the big ones. When you buy coffee, buy the best—ADMIRATION. Follow these two rules for a fuller enjoyment of life! Certainly there's nothing that can give everyday life a fuller zest than good coffee—and good coffee, to those who know, means ADMIRATION. One of the chief secrets of its goodness is that it is as fresh when you buy it as the fish you have just pulled out of the water! Try it for yourself and see just how good coffee really can be.

NEW "DIVINING ROD"

A new "divining rod" is being used to locate virgin oil fields in Texas and other States. It consists of a delicate seismograph, the instrument used to record earthquakes. The method is to create an artificial earthquake by exploding a charge of dynamite. The geological formation can be ascertained by the type of wave recorded on the seismograph. Oil is found only in certain known formations.

Some oilmen, however, still prefer the old divining rod. It consists of the forked branch of a tree. The arms of the fork are about a foot long, and the stem portion rather longer.

The "dowser," or diviner, clasps the arms of the fork with his knuckles outward and his thumbs on the ends, and holds it against his chest with the stem pointing upwards. He then walks slowly over the area to be searched. When he passes over an oil deposit, the stem is supposed to jerk downward.

Some people consider the use of divining rods pure hokum, while others claim it is an infallible method of locating everything from oil and water to buried treasure.

GOING UP

The latest in elevators are two high-speed lifts installed by the U. S. Park Service at the famous Carlsbad Caverns, in New Mexico. Each is capable of carrying 500 passengers per hour and takes only a minute to make the 750-foot trip up or down. Dials inside the cages record the depth, and telephones keep the operator in touch with the surface at all times.

The earliest form of elevator was a simple platform pulled up and down by hand. This was next made into a car worked by steam or water power—later by an electric motor.

Modern express elevators often go 50 floors without stopping, at a speed of 1,000 feet a minute. In dropping, such elevators use the air below them, compressed in the bottom of the shaft by their rapid fall, as a cushion to ease the shock of descent.
